

Comp1: Comparison with 2014 assessments

ABT-MSE Operating model fitting report

Tom Carruthers

July 07, 2017

Operating model scenario is:

Mimicking
the
2014 assessments

Fits to CPUE indices of relative abundance

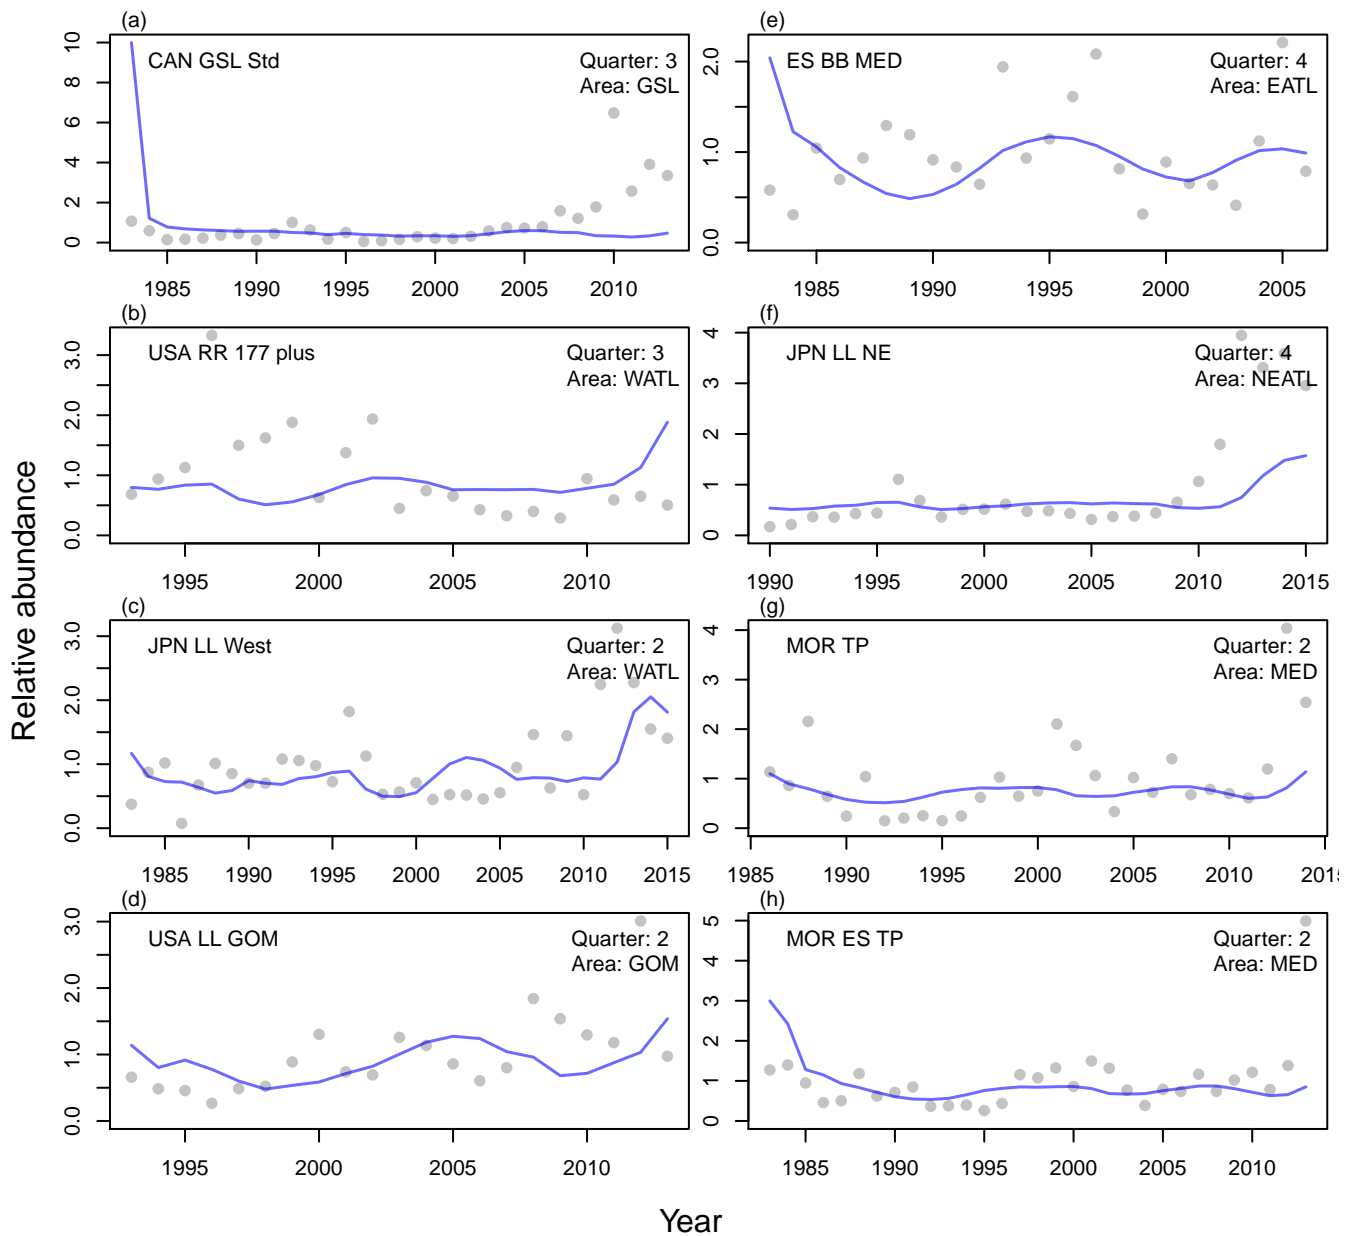

Figure 1. Assessment CPUE index fits (blue line = predicted, grey dots = index)

Figure 2. ‘Master index’ tracking (implied fit): grey line is index, the purple line is both stocks combined.

SSB, recruitment and F comparison with 2014 assessment (by East/West area, not East/West stock)

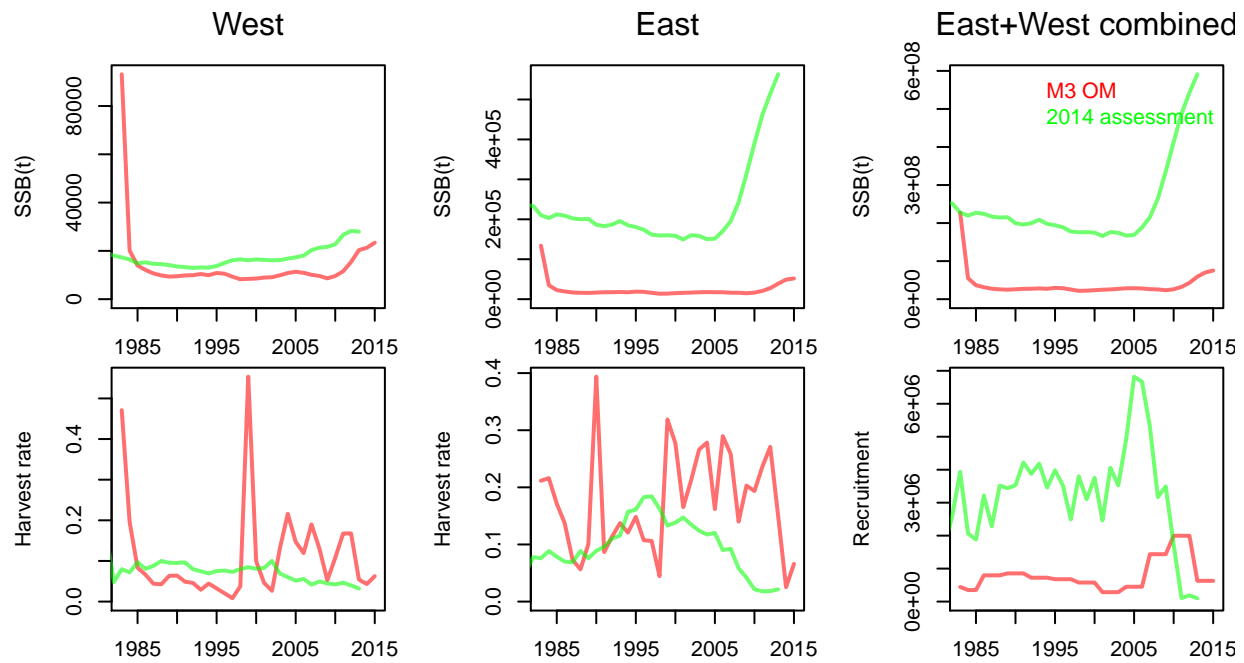

Figure 3. Regional comparisons (45deg W) with 2014 stock assessment.

Stock-recruitment relationships (by East/West stock)

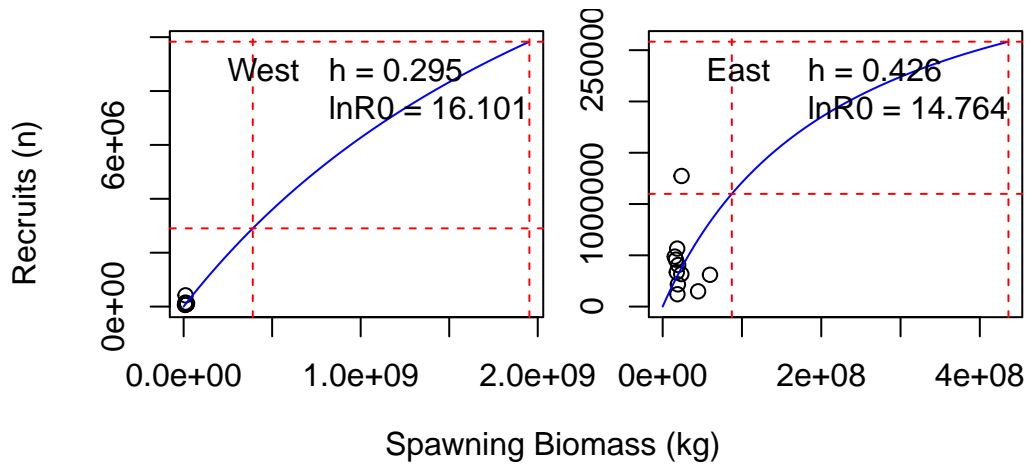

Figure 4. Model predicted pairs of SSB and recruitment (with a fitted Bev Holt for illustration)

MSY reference points (by East/West stock)

Table 1. Reference points by stock.

	MSY	FMSY _{ap}	UMSY	BMSY	SSBMSY	BMSY_B0	SSBMSY_SSB0	RMSY_R0	F_FMSY	SSB_SSBMSY
East	5852	0.234	0.018	330542	302091	0.415	0.404	0.668	0.292	0.123
West	24335	0.098	0.015	1616425	1536941	0.457	0.452	0.580	1.609	0.014

2014 Assessment MSY reference points (by East/West area)

Table 2. Where available, reference points from most recent assessments

	MSY	FMSY _{ap}	UMSY	BMSY	SSBMSY	BMSY_B0	SSBMSY_SSB0	RMSY_R0	F_FMSY	SSB_SSBMSY
East	-	-	-	-	-	-	-	-	0.75	0.45
West	3056	0.23	-	-	13268	-	-	-	0.47-0.85	0.35-2.1

Current annual mean F-at-age profile, all fleets, seasons, areas

Figure 5. The current profile of F at age summed over all fleets.

Estimated size selectivity by fleet

Figure 6.

Estimated unfished movement and spatial distribution

Figure 7. The implied asymptotic distribution of fish under unfished conditions (red-orange-green-white, more to less)

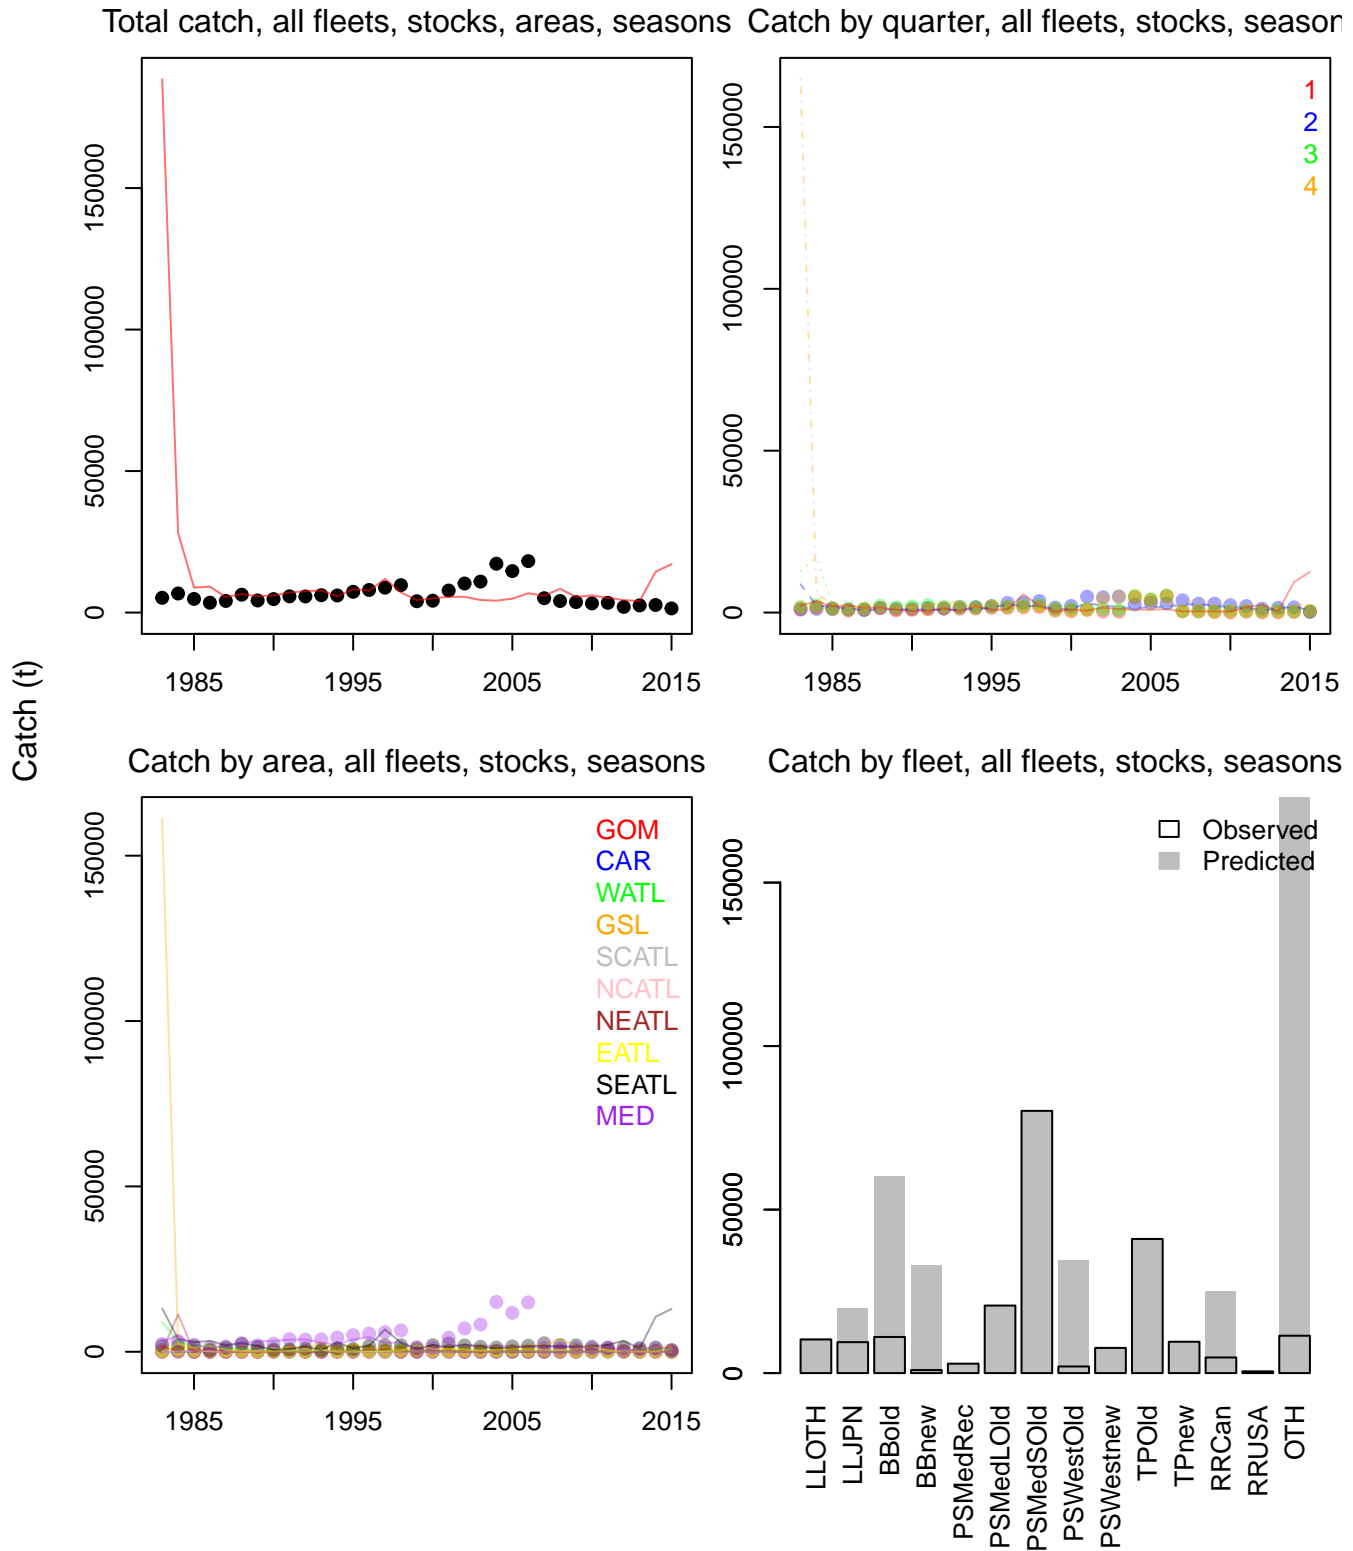

Figure 8. Fit to a observed total catches aggregated over various axes (lines = predicted, points = observed)

Fit to aggregate length composition

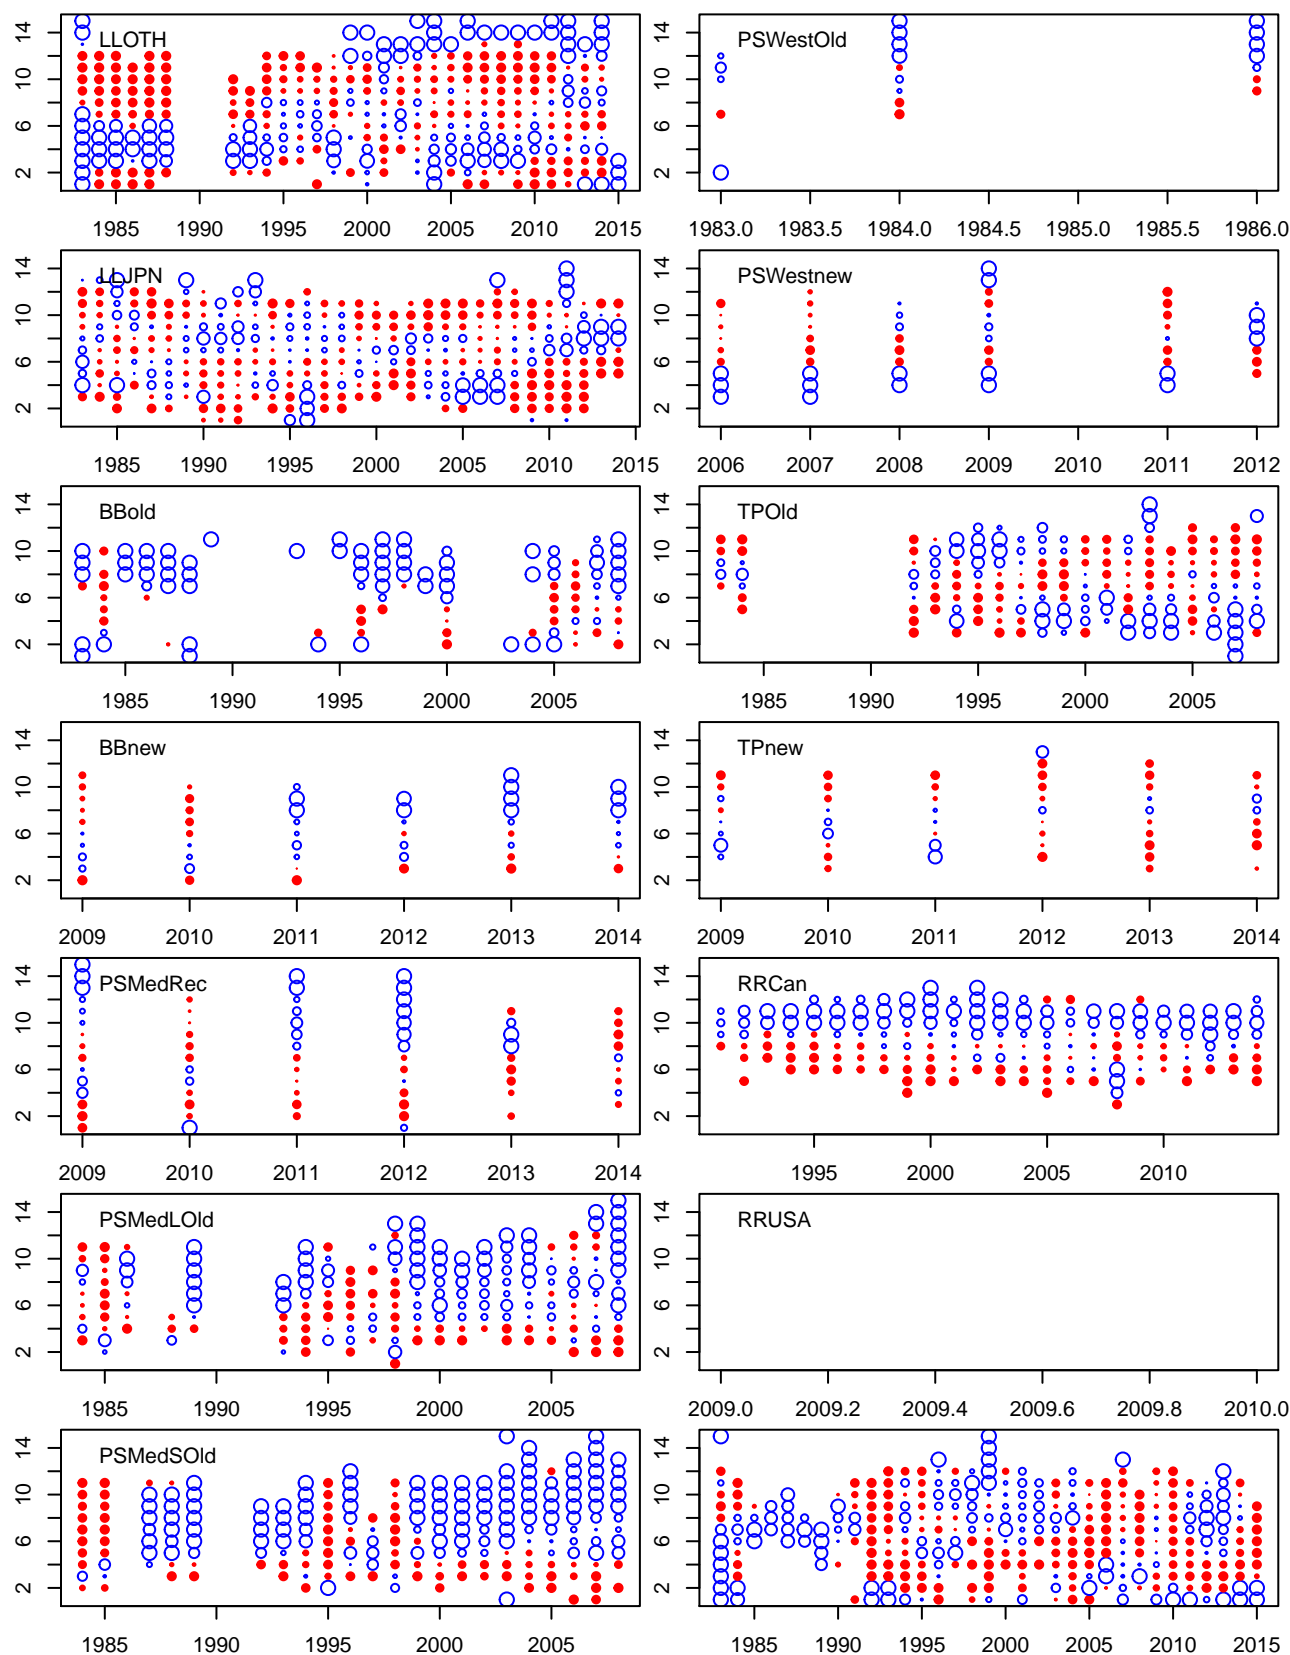

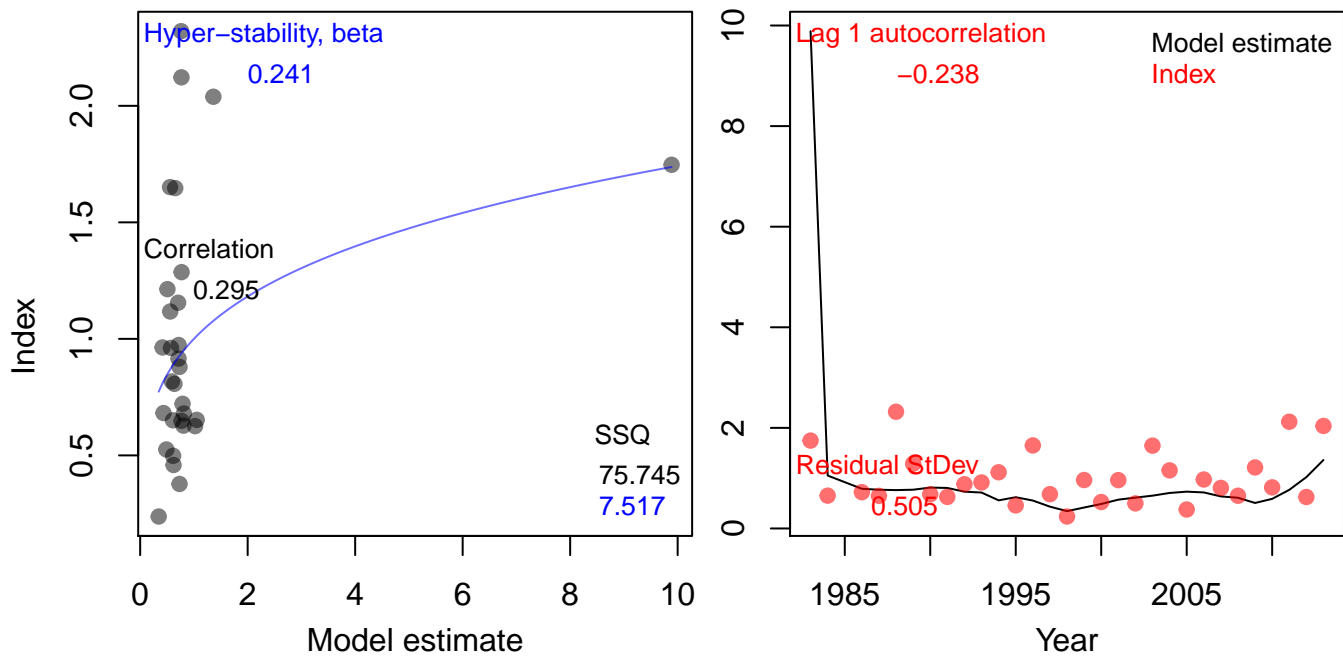

Figure 9. Length composition residuals. Red points are negative Pearson residuals (predicted is higher than observed), blue circles are positive (predicted is lower than observed)

Other model estimates and fits

Statistical properties of indices for use in Management Procedures

Index fit and statistical properties for GOM_Larval

Index fit and statistical properties for JP_LL_W

Index fit and statistical properties for US-CAN

Index fit and statistical properties for JP_LL_NE

Index fit and statistical properties for MED_Larval

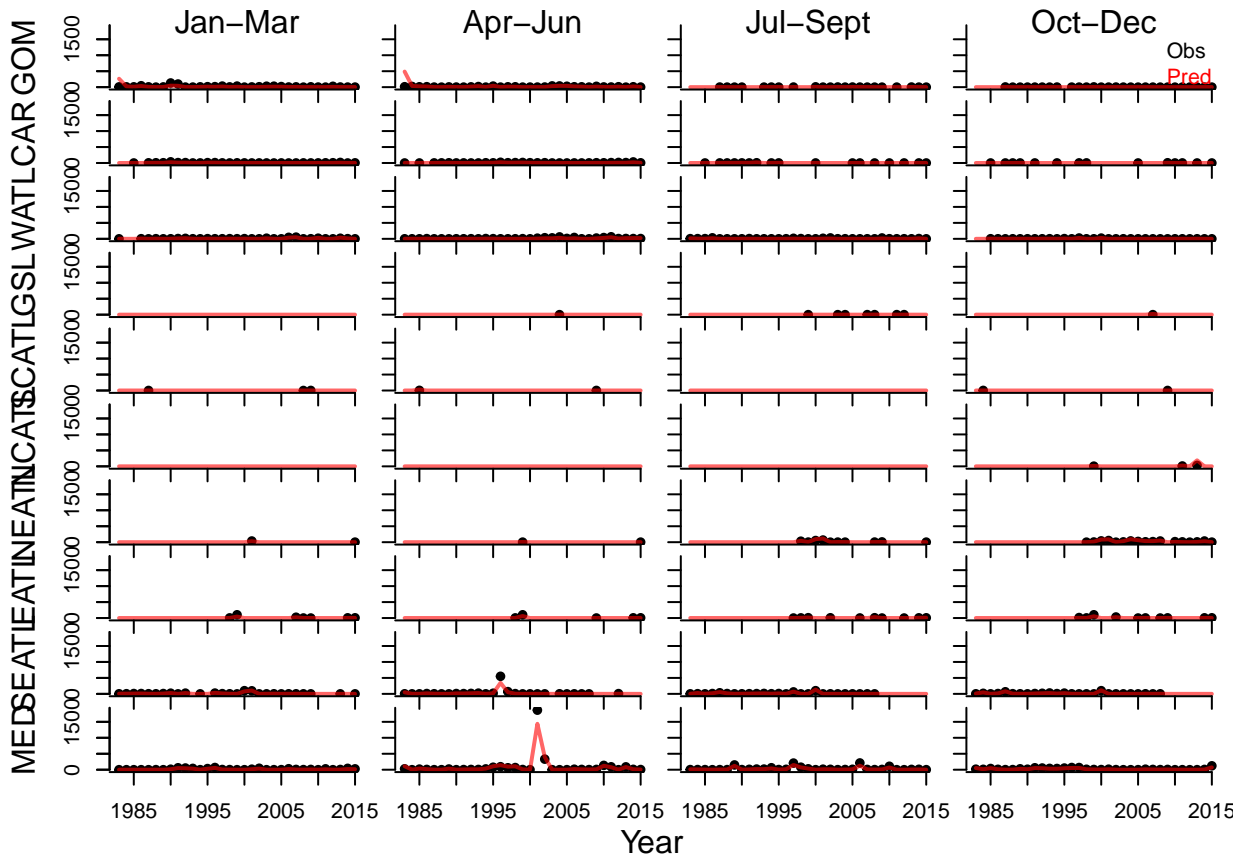

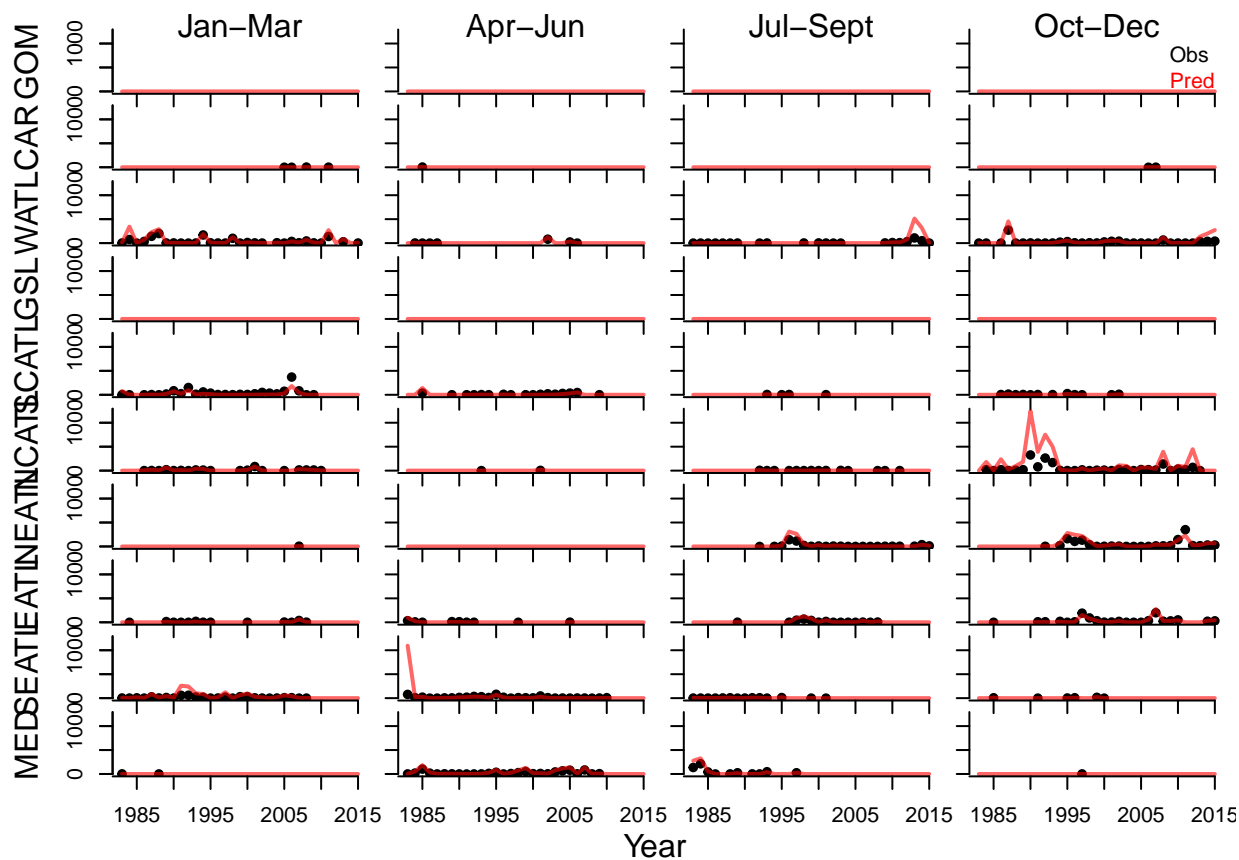

Figure 10.

Fit to observed catches

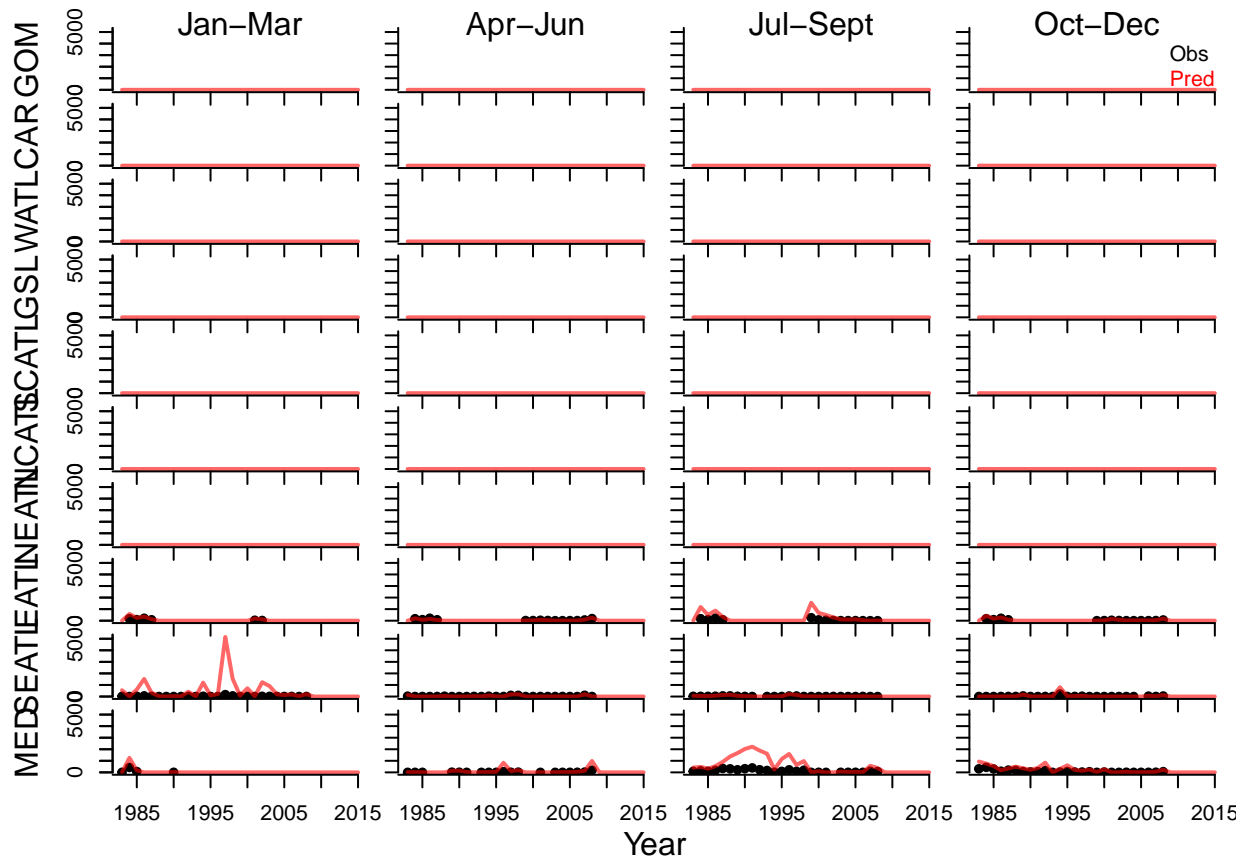

Observed catches (tonnes) for LLOTH

Observed catches (tonnes) for LLJPN

Observed catches (tonnes) for BBold

Observed catches (tonnes) for BBnew

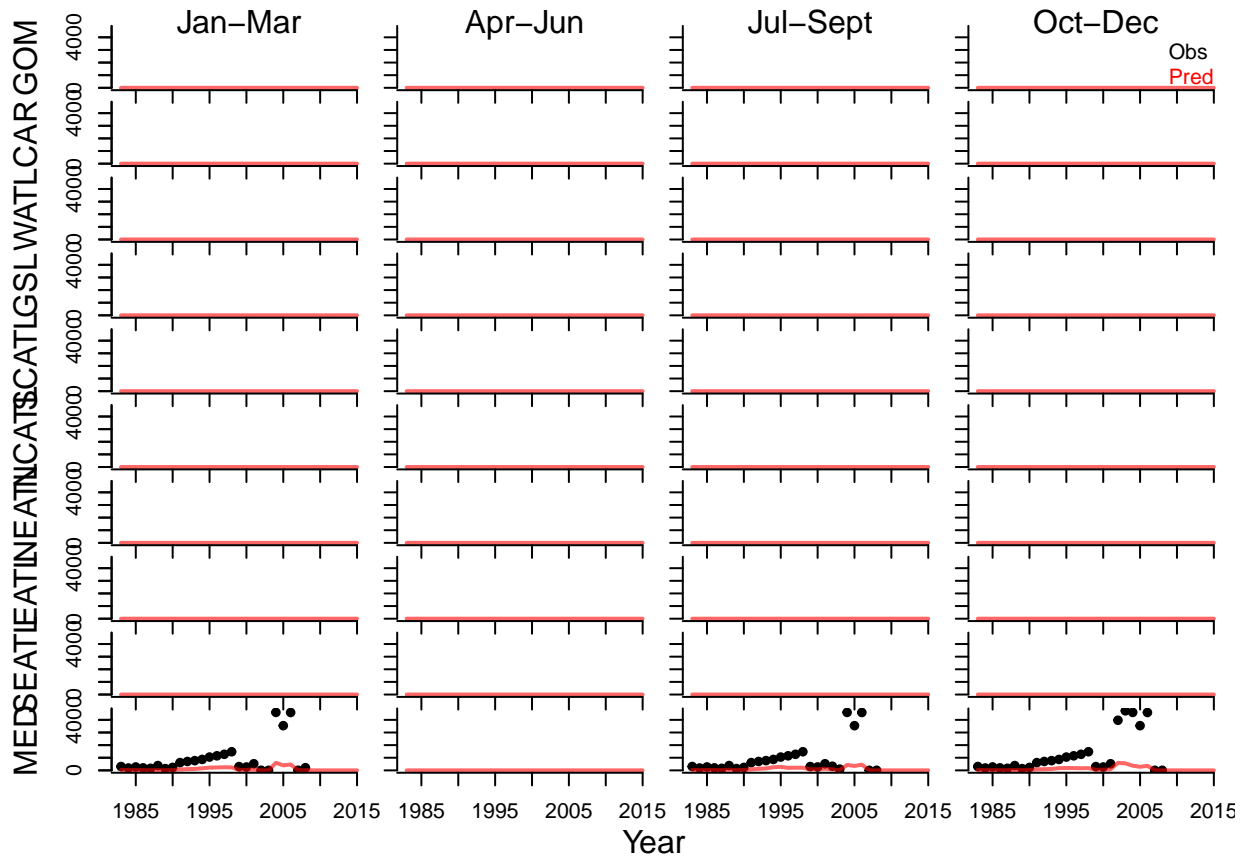

Observed catches (tonnes) for PSMedRec

Observed catches (tonnes) for PSMedLOld

Observed catches (tonnes) for PSMedSOld

Observed catches (tonnes) for PSWestOld

Observed catches (tonnes) for PSWestnew

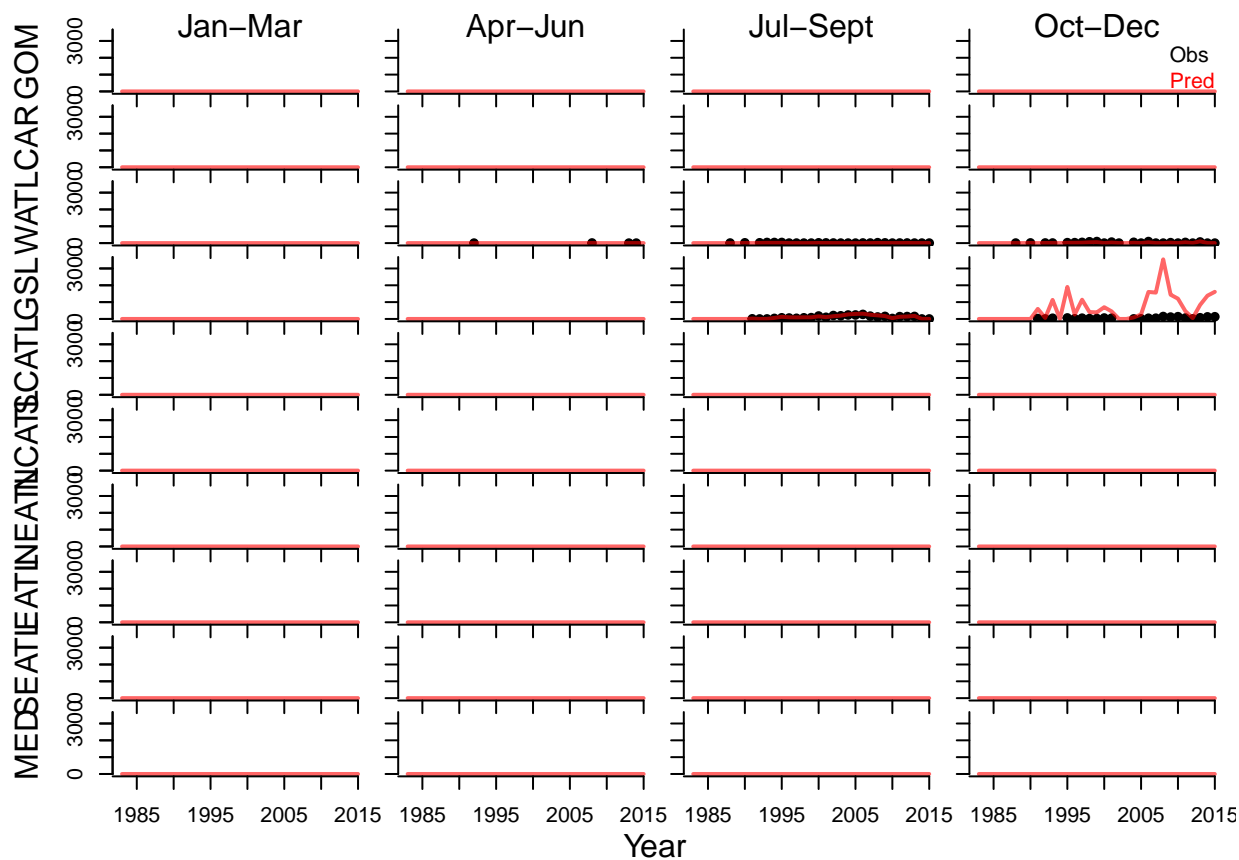

Observed catches (tonnes) for TPold

Observed catches (tonnes) for TPnew

Observed catches (tonnes) for RRCan

Observed catches (tonnes) for RRUSA

Observed catches (tonnes) for ALL OTH

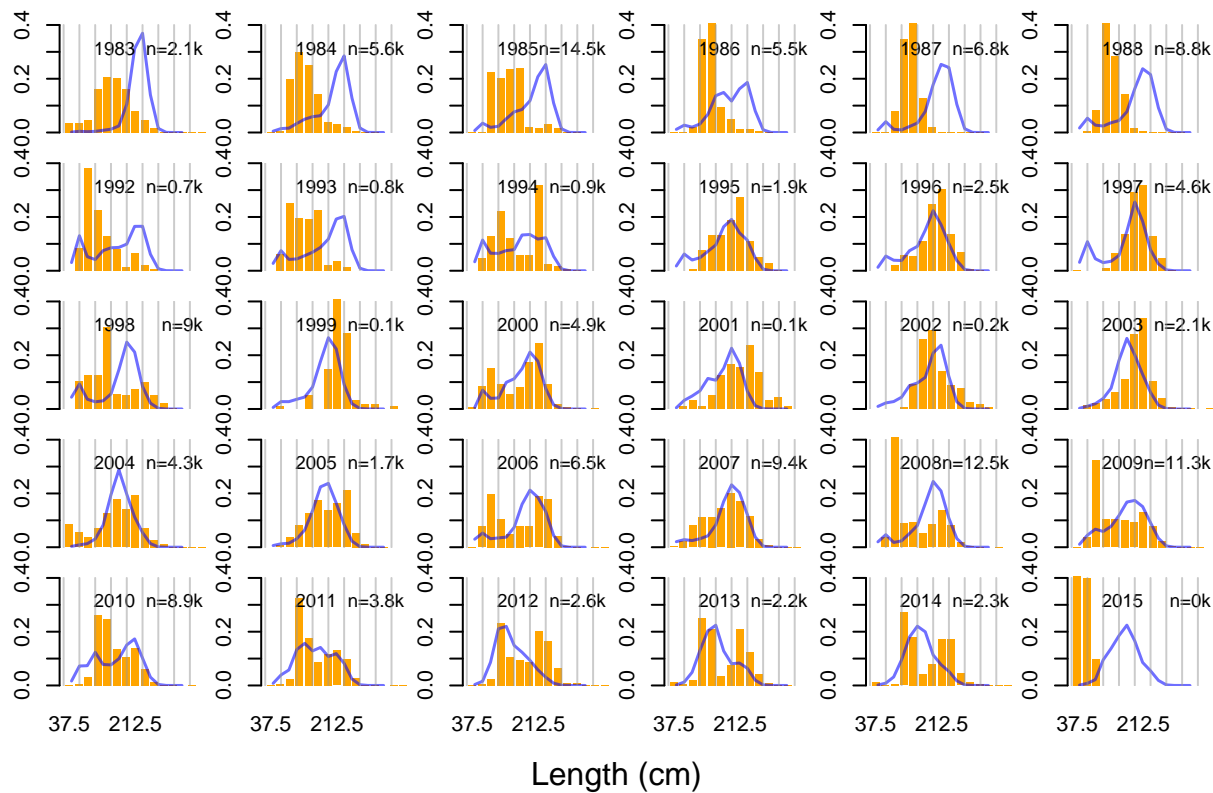

Figure 11.

Fit to observed size composition

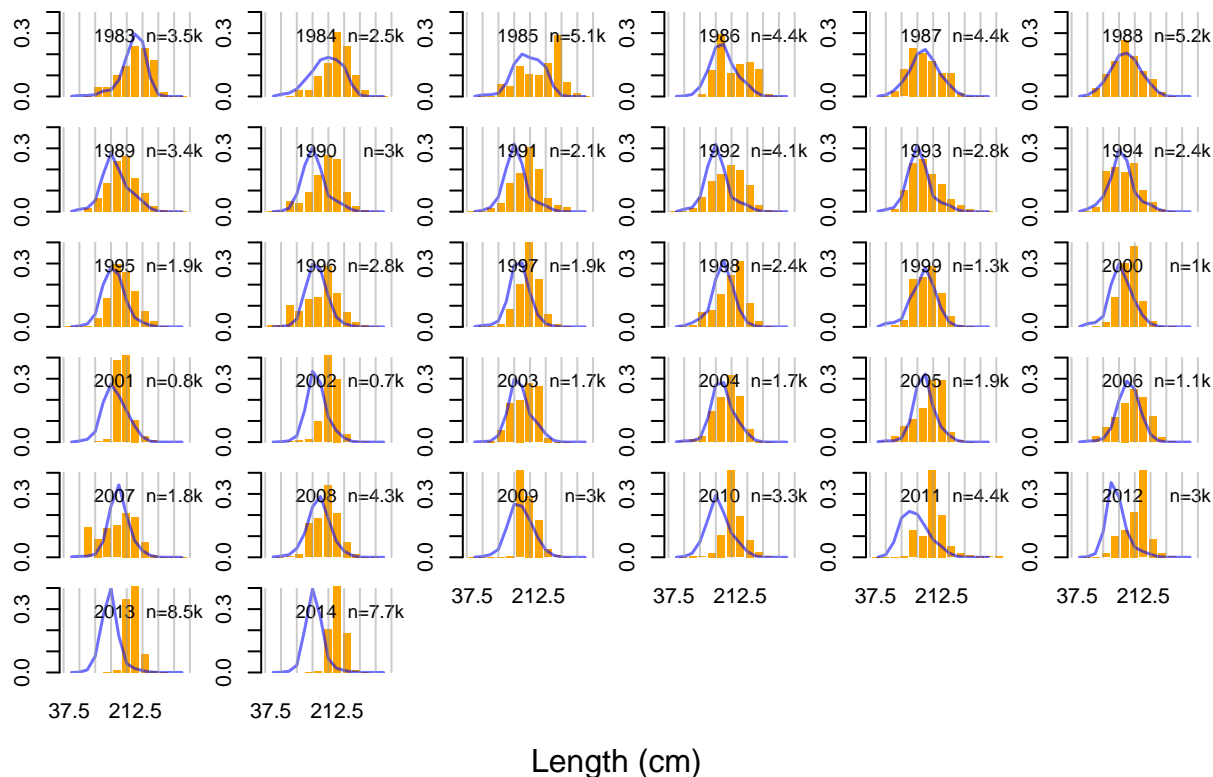

Length composition fit for LLOTH

redicted (blue line) versus observed (orange bar) catch at length for the LLOTH fleet (n=1:

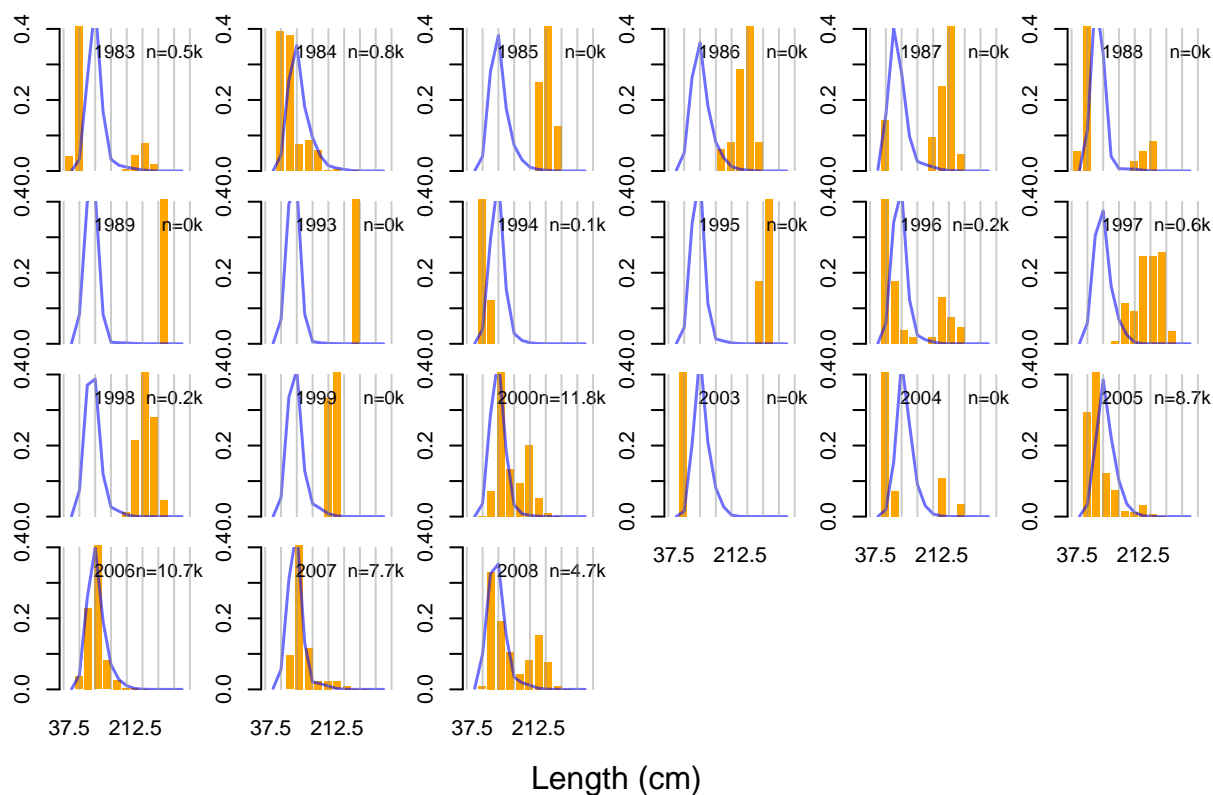

Length composition fit for LLJPN

redicted (blue line) versus observed (orange bar) catch at length for the LLJPN fleet (n=9)

Length composition fit for BBold

redicted (blue line) versus observed (orange bar) catch at length for the BBold fleet (n=4)

Length composition fit for BBnew

redicted (blue line) versus observed (orange bar) catch at length for the BBnew fleet (n=1

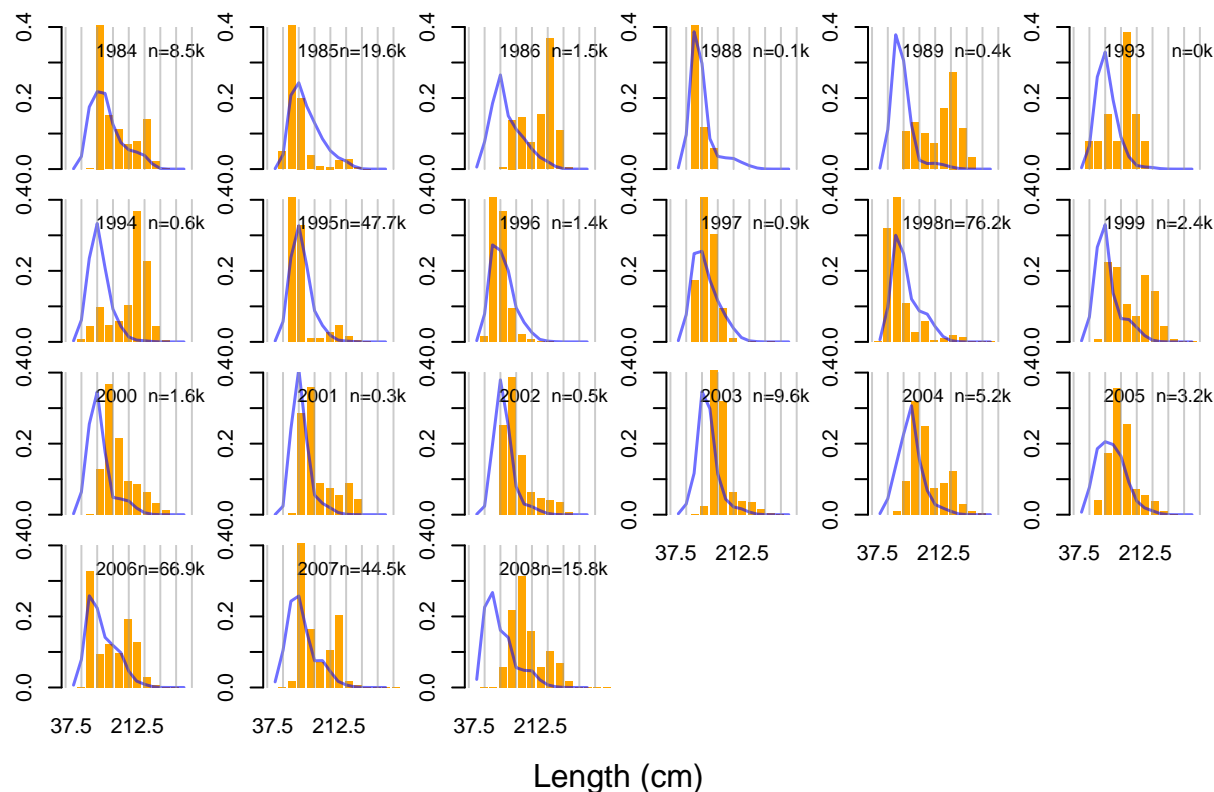

Length composition fit for PSMedRec

redicted (blue line) versus observed (orange bar) catch at length for the PSMedRec fleet (n=

Length composition fit for PSMedLOld

cted (blue line) versus observed (orange bar) catch at length for the PSMedLOld fleet (n:

Length composition fit for PSMedSOld

cted (blue line) versus observed (orange bar) catch at length for the PSMedSOld fleet (n:

Length composition fit for PSWestOld

dicted (blue line) versus observed (orange bar) catch at length for the PSWestOld fleet (r

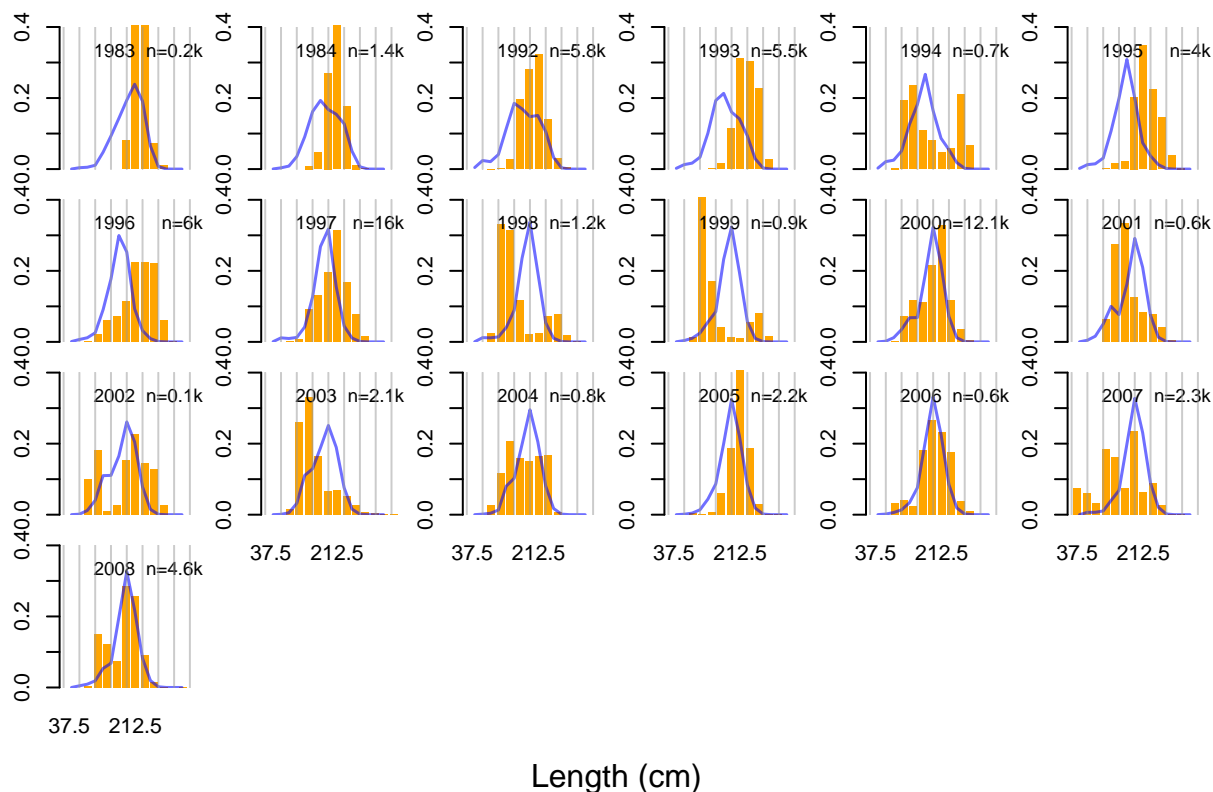

Length composition fit for PSWestnew

licted (blue line) versus observed (orange bar) catch at length for the PSWestnew fleet (n

Length composition fit for TPold

redicted (blue line) versus observed (orange bar) catch at length for the TPold fleet (n=6

Length composition fit for TPnew

redicted (blue line) versus observed (orange bar) catch at length for the TPnew fleet (n=2

Length composition fit for RRCan

redicted (blue line) versus observed (orange bar) catch at length for the RRCan fleet (n=3

Length composition fit for RRUSA

redicted (blue line) versus observed (orange bar) catch at length for the RRUSA fleet (n=

Length composition fit for ALL OTH

dicted (blue line) versus observed (orange bar) catch at length for the ALL OTH fleet (n=

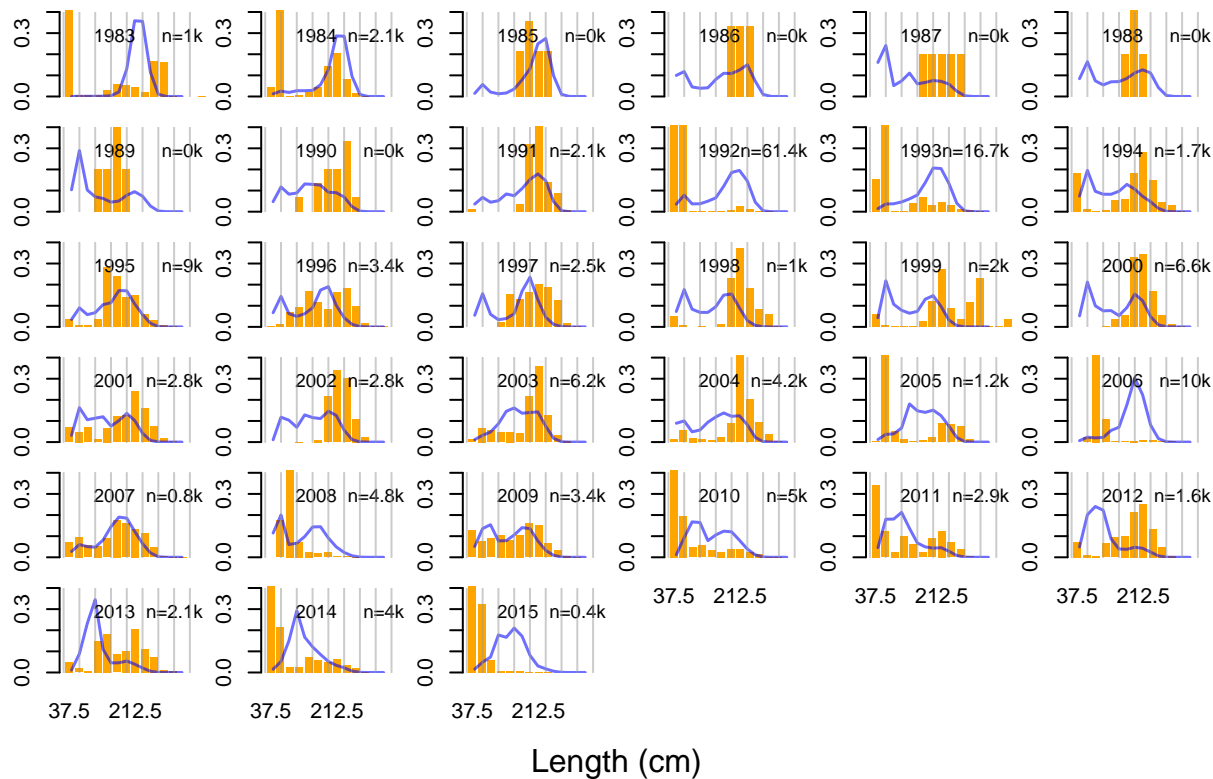

Figure 12. blue = predicted, orange = observed.
