

# Comp1: Comparison with 2014 assessments

## ABT-MSE Operating model fitting report

*Tom Carruthers*

*March 10, 2017*

**Operating model scenario is:**

Mimicking  
the  
2014 assessments

**Fits to CPUE indices of relative abundance**

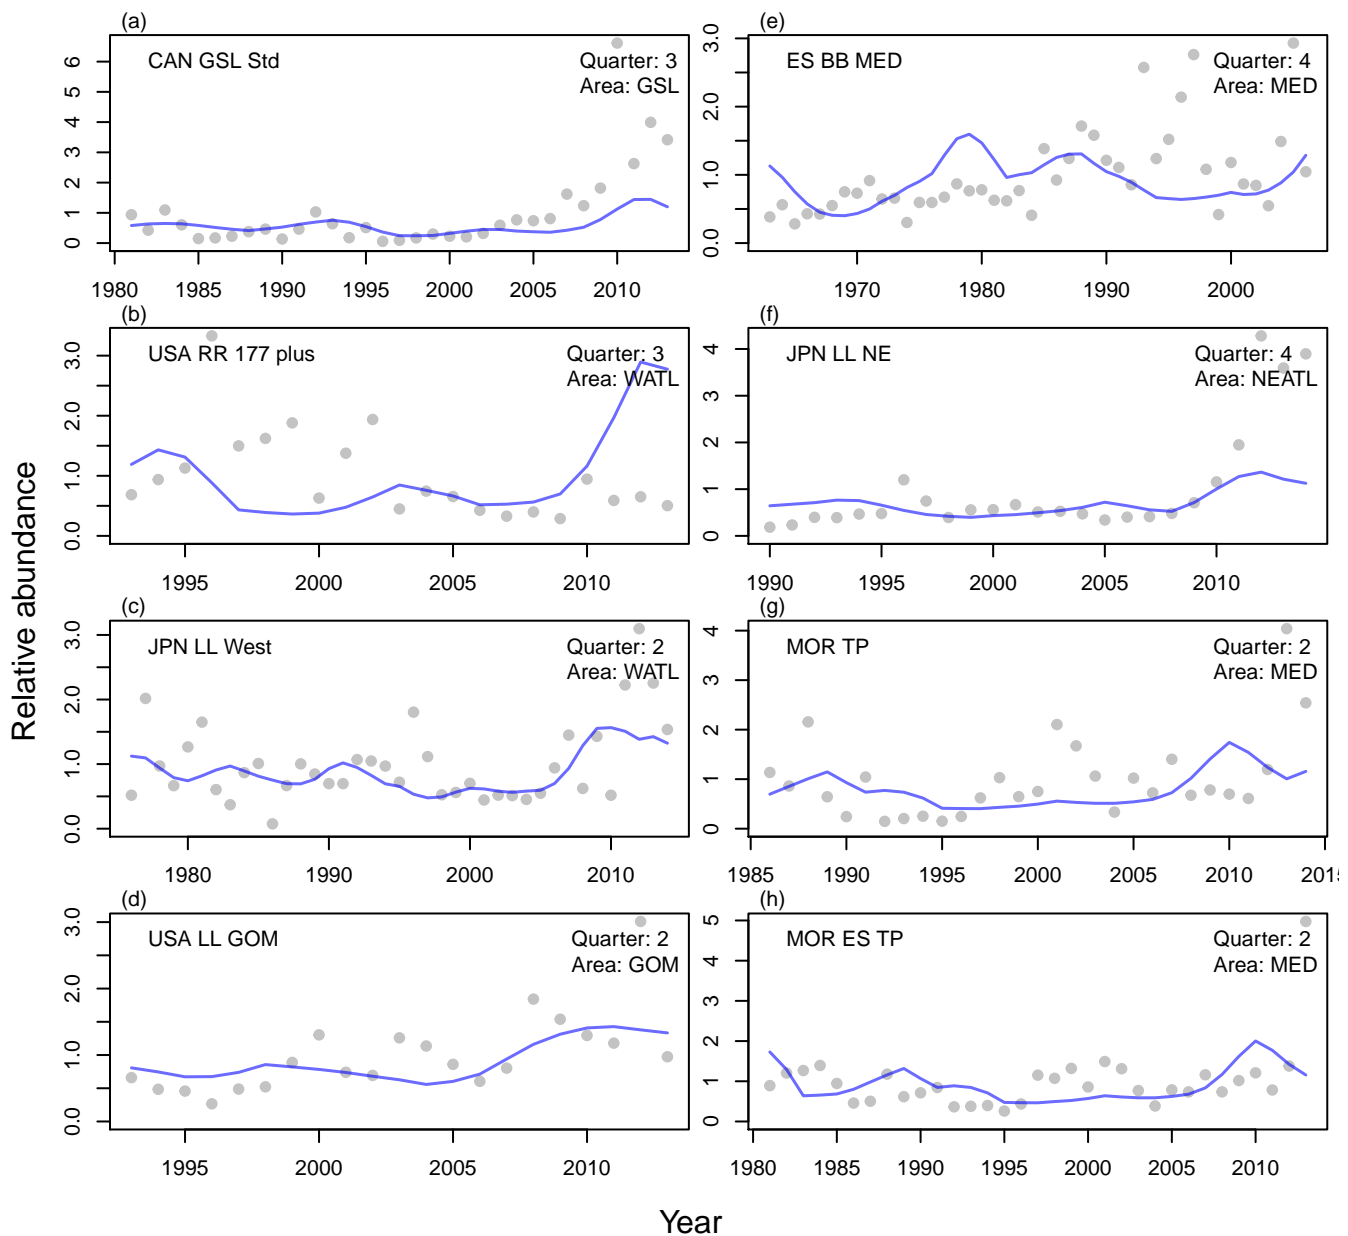

Figure 1. Assessment CPUE index fits (blue line = predicted, grey dots = index)

Figure 2. ‘Master index’ tracking (implied fit): grey line is index, the purple line is both stocks combined.

# SSB, recruitment and F comparison with 2014 assessment (by East/West area, not East/West stock)

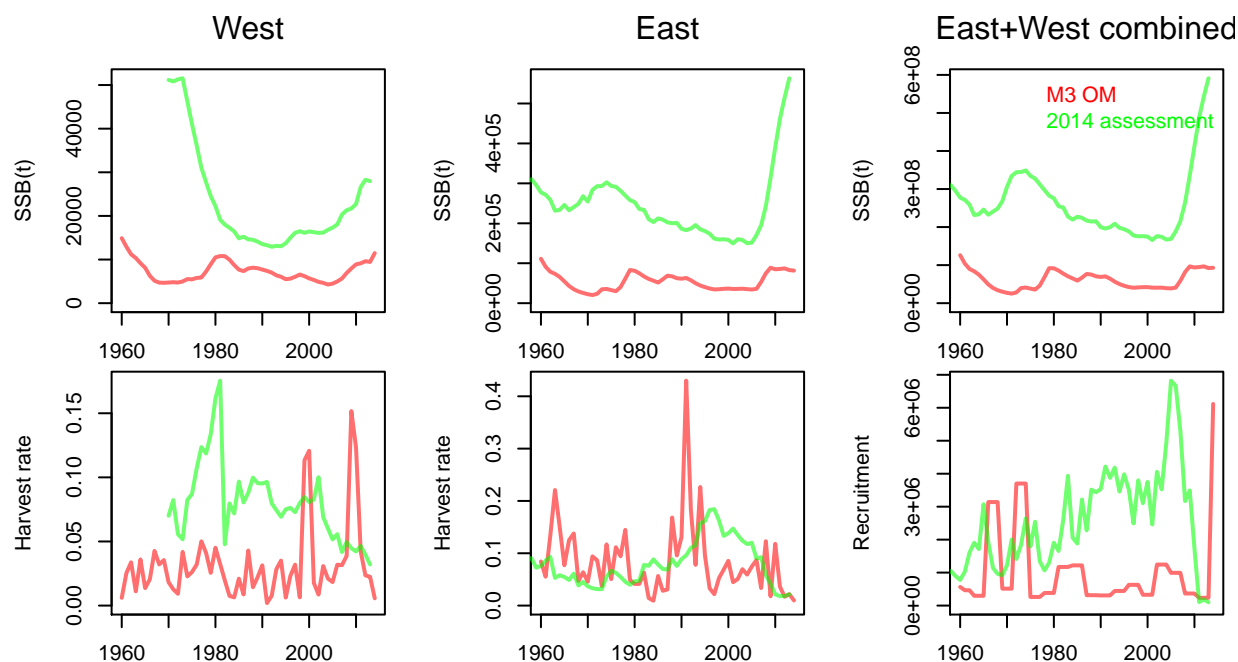

Figure 3. Regional comparisons (45deg W) with 2014 stock assessment.

## Stock-recruitment relationships (by East/West stock)

Figure 4. Model predicted pairs of SSB and recruitment (with a fitted Bev Holt for illustration)

## MSY reference points (by East/West stock)

Table 1. Reference points by stock.

	MSY	FMSY <sub>ap</sub>	UMSY	BMSY	SSBMSY	BMSY_B0	SSBMSY_SSB0	RMSY_R0	F_FMSY	SSB_SSBMSY
East	8829	0.385	0.185	47664	20980	0.278	0.175	0.943	0.018	4.230
West	72	0.043	0.011	6576	2346	0.496	0.465	0.536	0.257	1.508

## 2014 Assessment MSY reference points (by East/West area)

Table 2. Where available, reference points from most recent assessments

	MSY	FMSY <sub>ap</sub>	UMSY	BMSY	SSBMSY	BMSY_B0	SSBMSY_SSB0	RMSY_R0	F_FMSY	SSB_SSBMSY
East	-	-	-	-	-	-	-	-	0.75	0.45
West	3056	0.23	-	-	13268	-	-	-	0.47-0.85	0.35-2.1

Current annual mean F-at-age profile, all fleets, seasons, areas

Figure 5. The current profile of F at age summed over all fleets.

Estimated size selectivity by fleet

Figure 6.

## Estimated unfished movement and spatial distribution

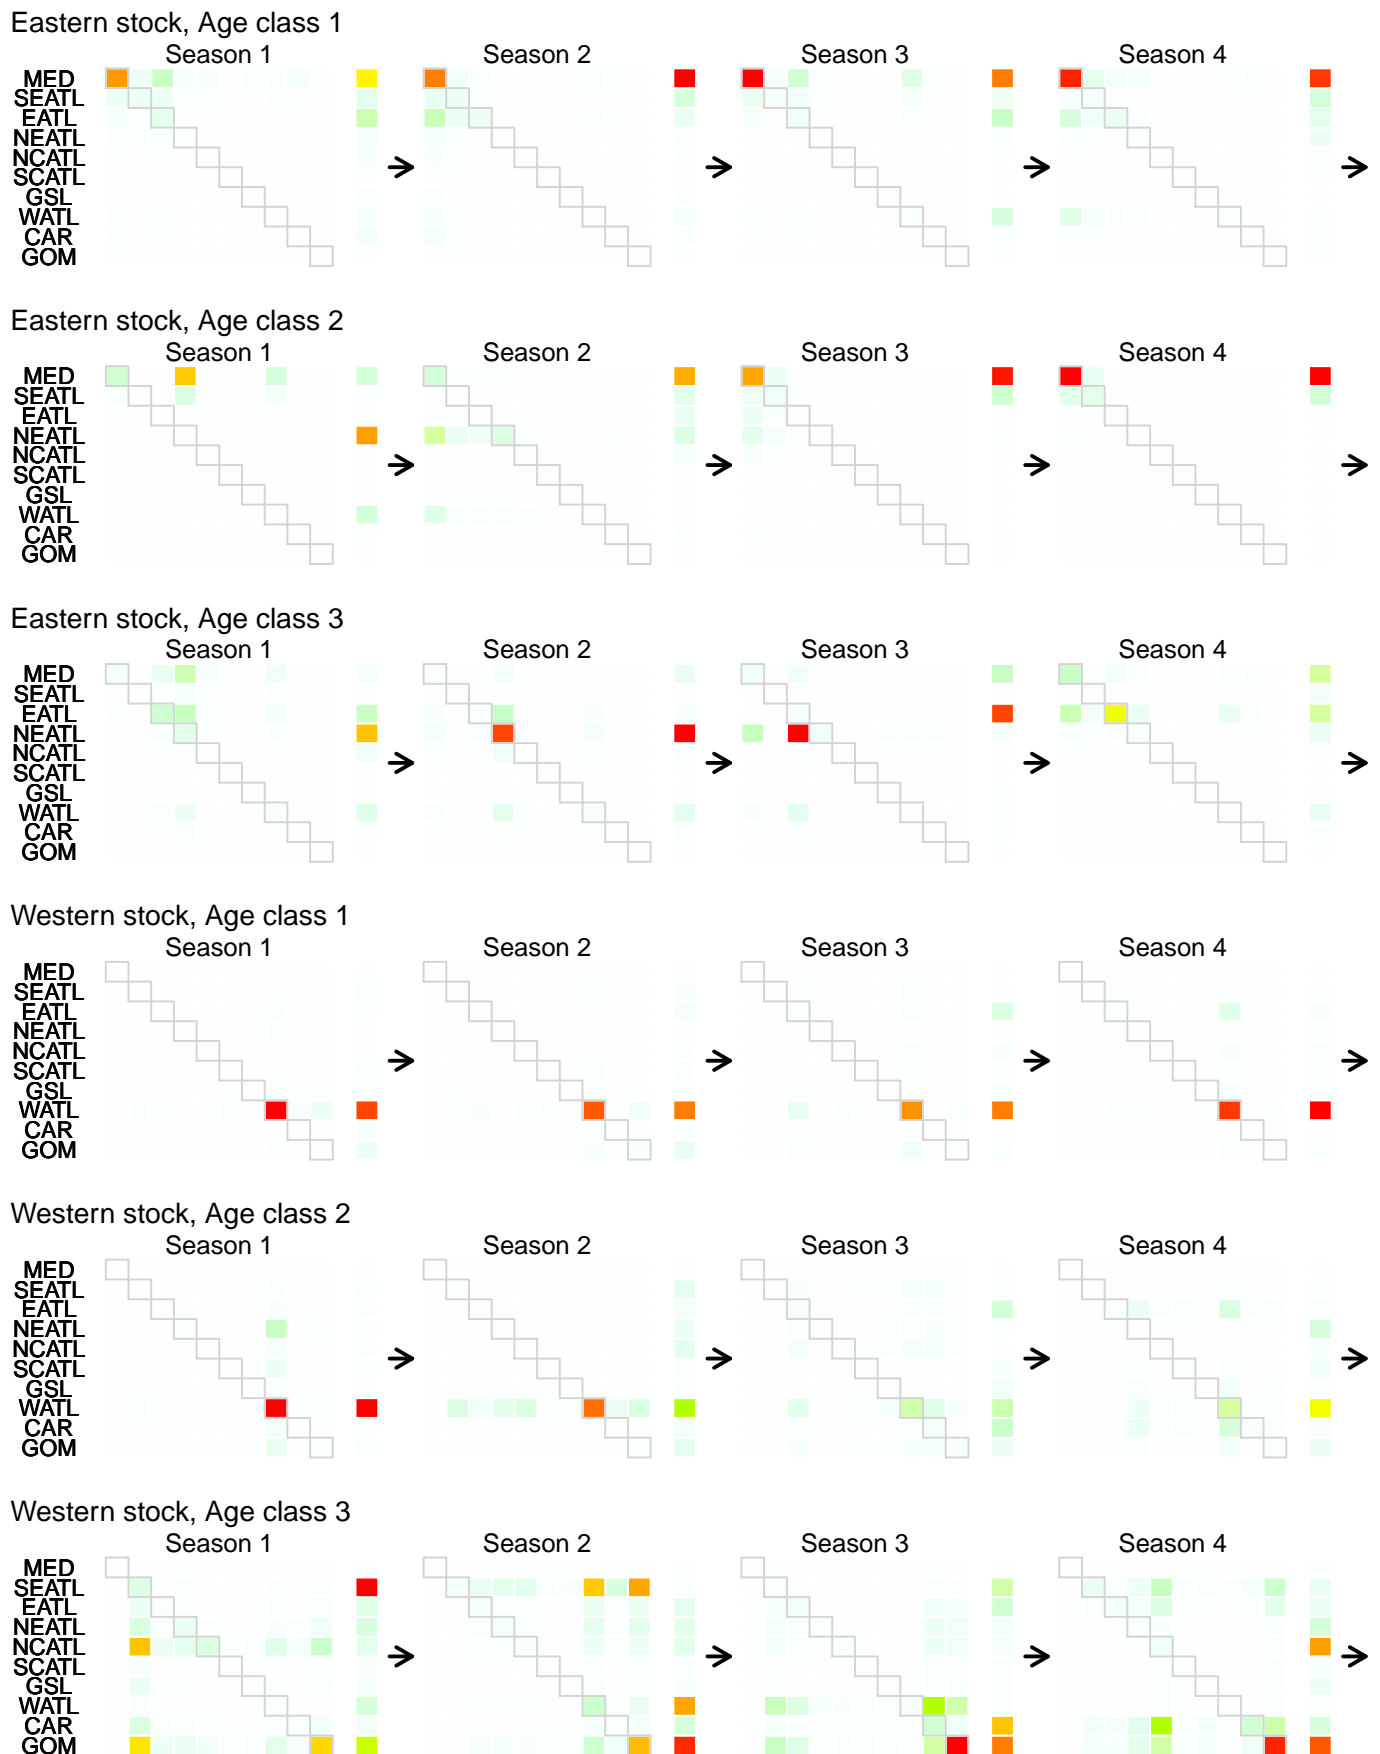

Figure 7. The implied asymptotic distribution of fish under unfished conditions (red-orange-green-white, more to less)

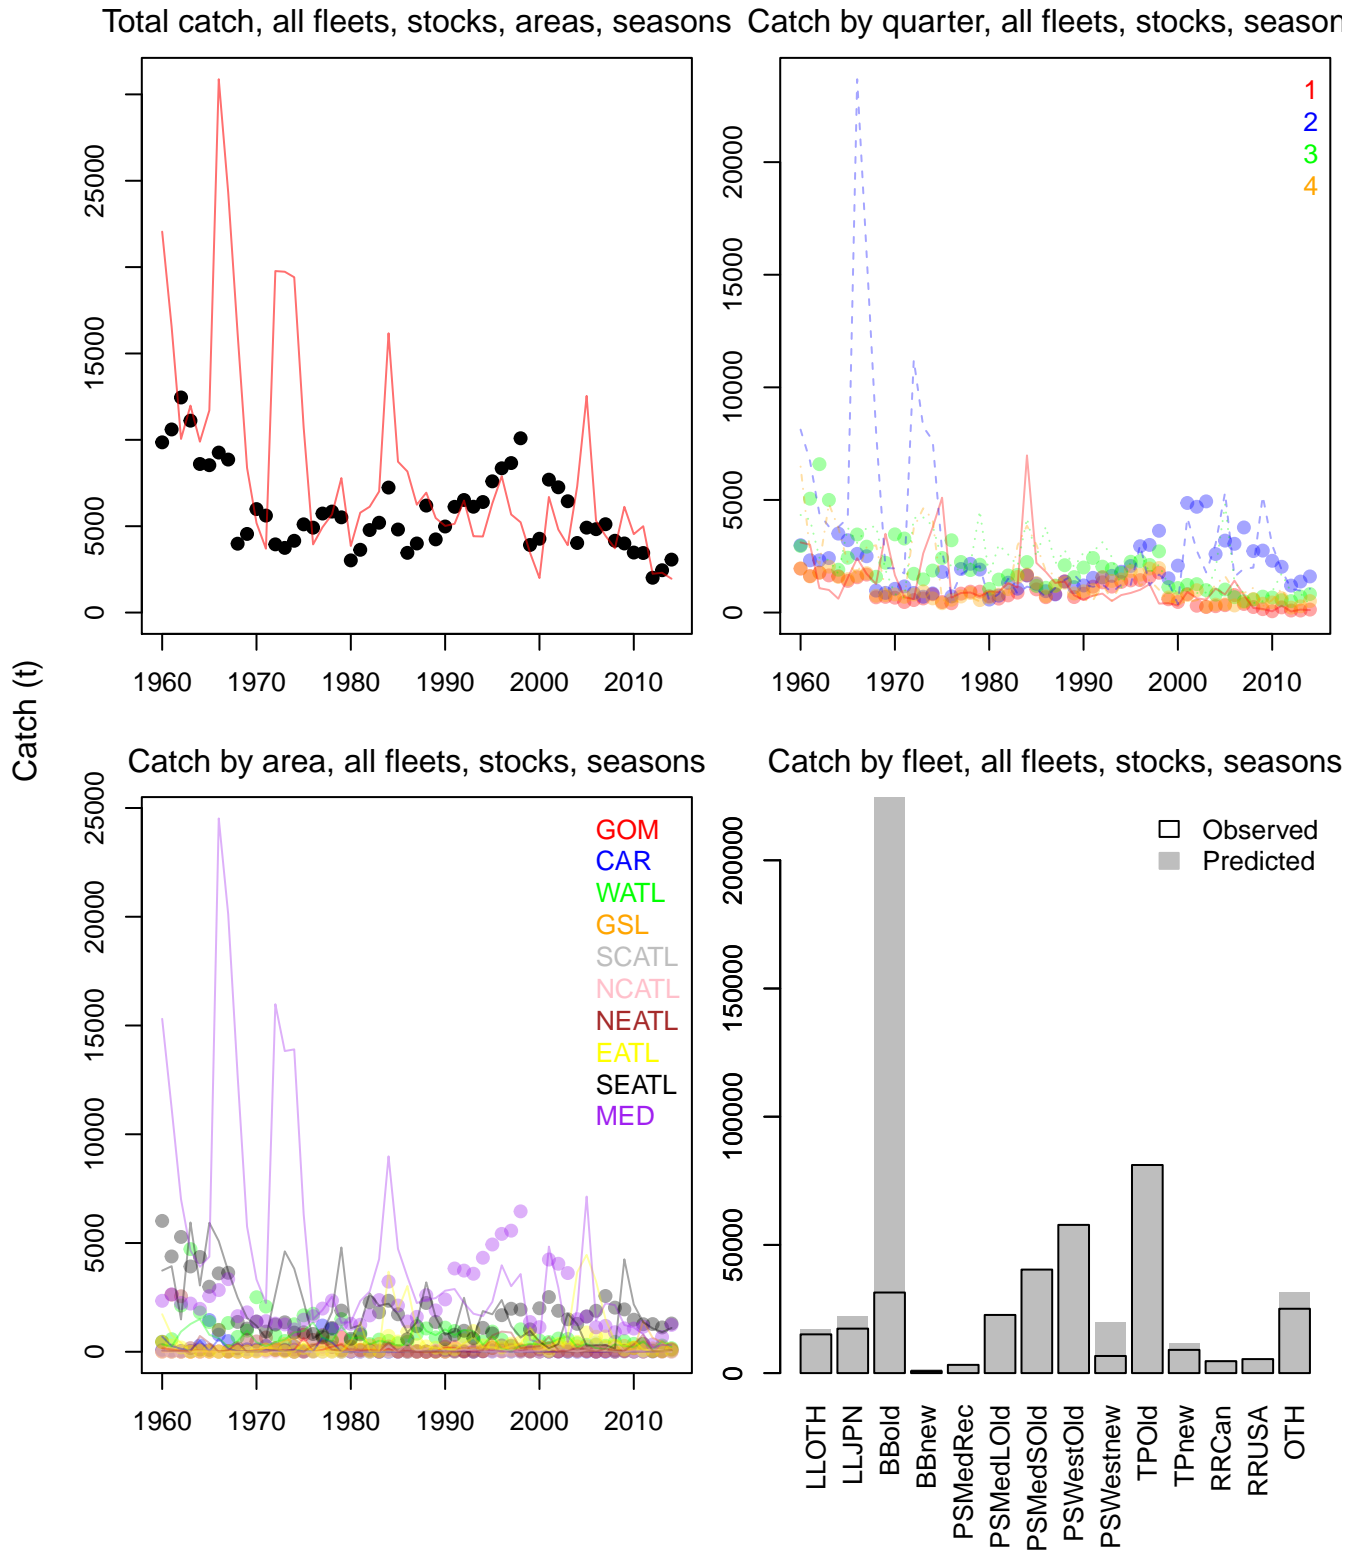

Figure 8. Fit to a observed total catches aggregated over various axes (lines = predicted, points = observed)

# Fit to aggregate length composition

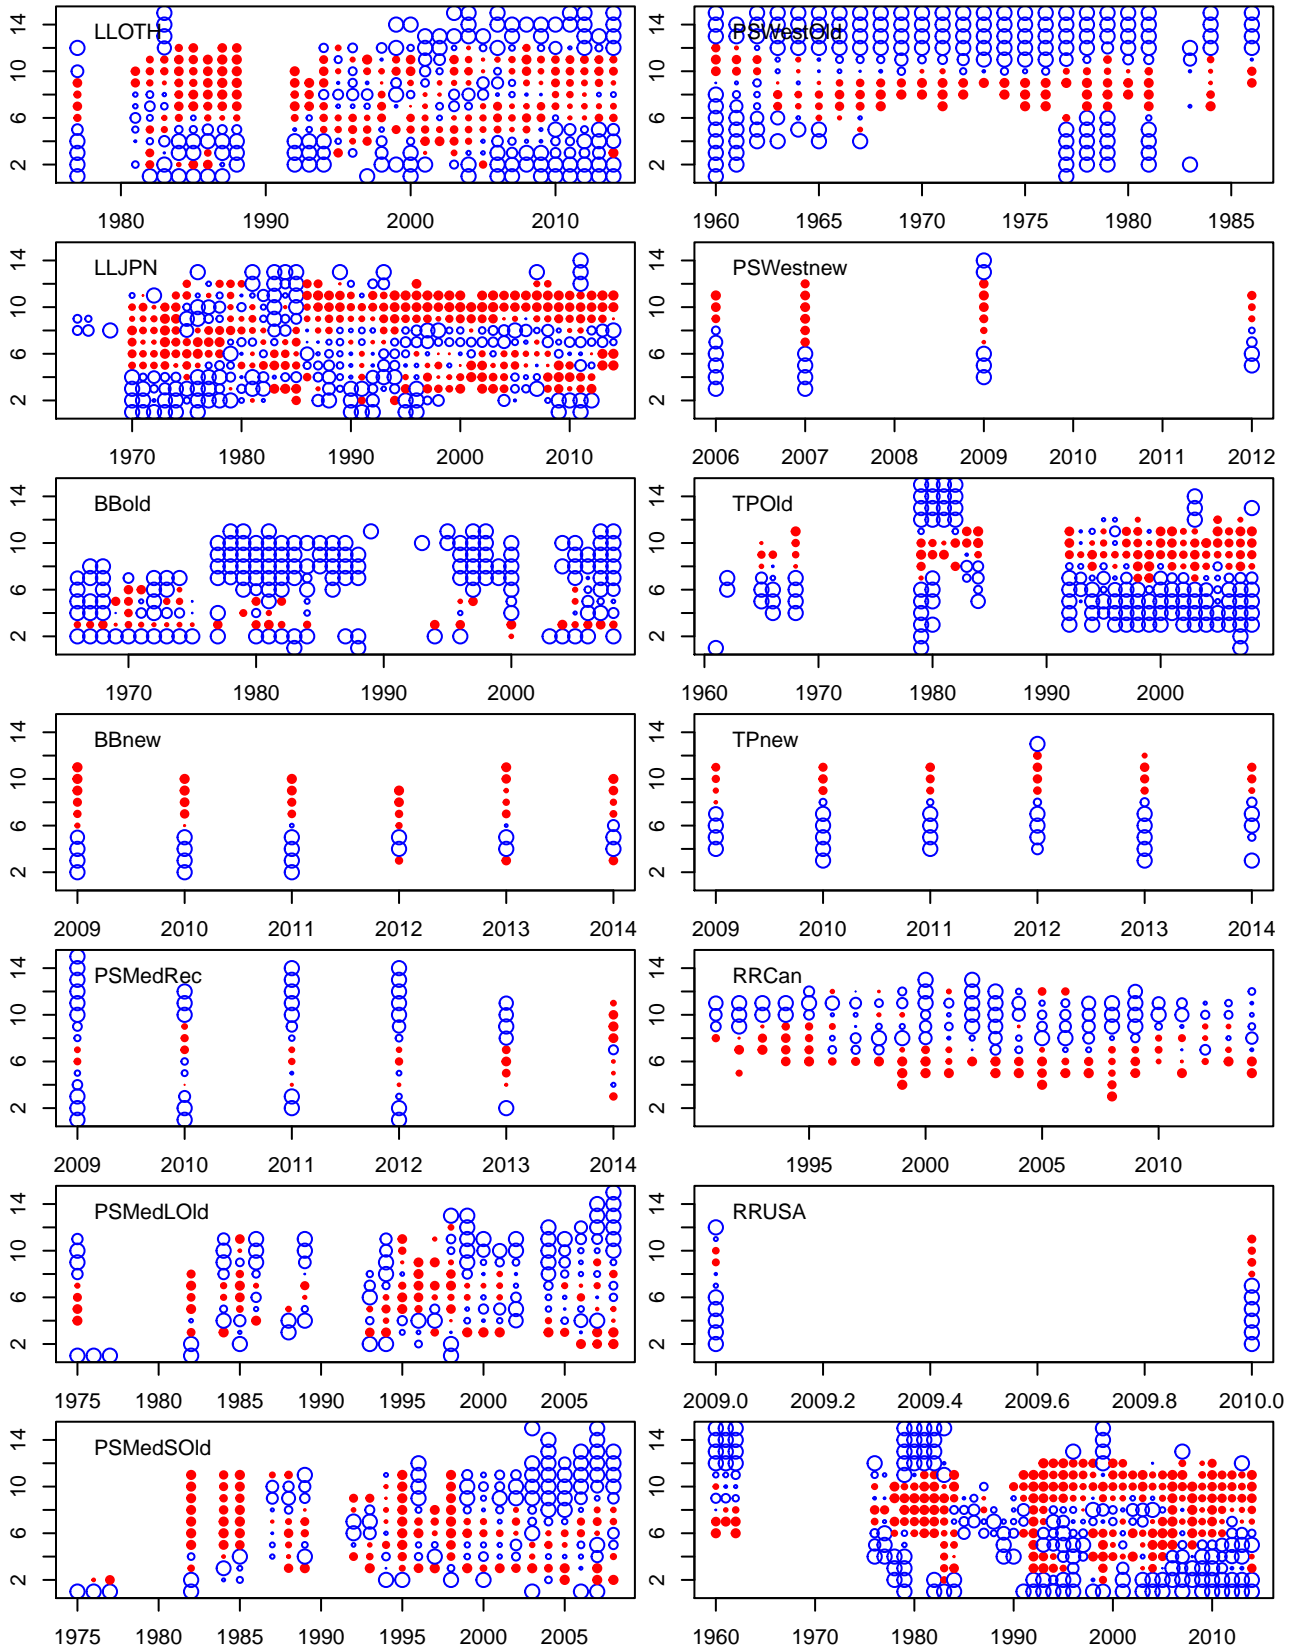

Figure 9. Length composition residuals. Red points are negative Pearson residuals (predicted is higher than observed), blue circles are positive (predicted is lower than observed)

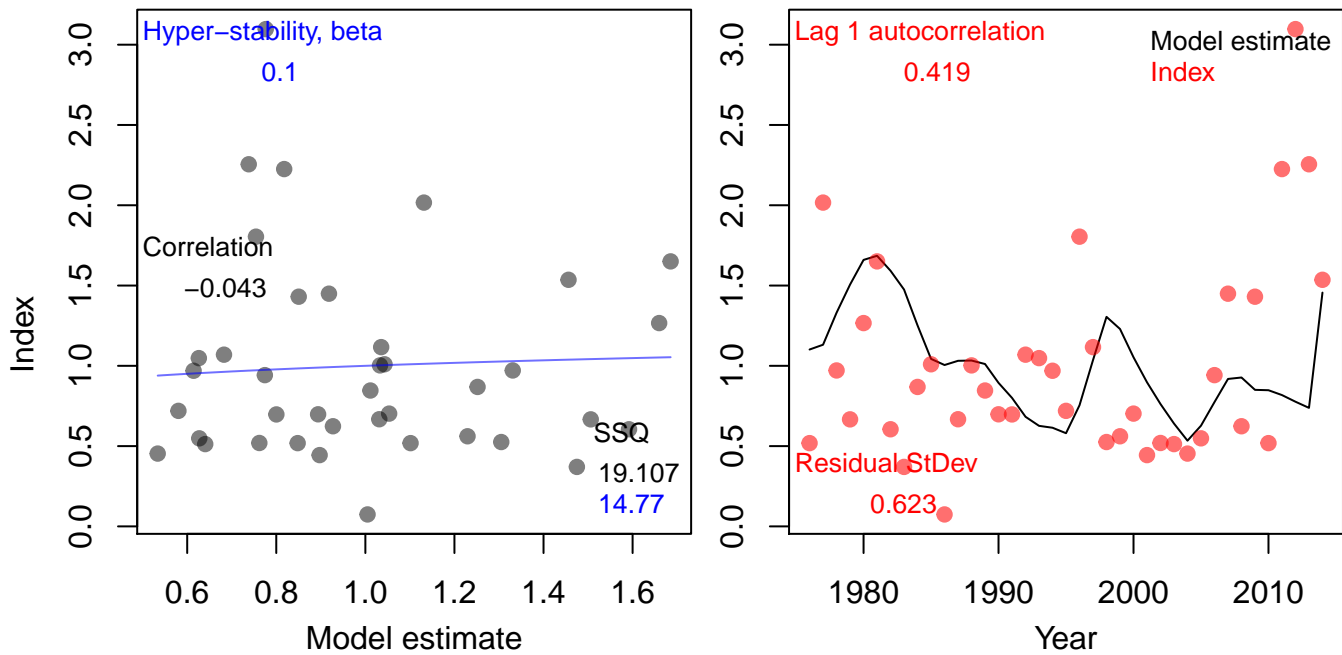

## Other model estimates and fits

### Statistical properties of indices for use in Management Procedures

#### Index fit and statistical properties for GOM\_Larval

#### Index fit and statistical properties for JP\_LL\_W

# Index fit and statistical properties for US-CAN

# Index fit and statistical properties for JP\_LL\_NE

Index fit and statistical properties for MED\_Larval

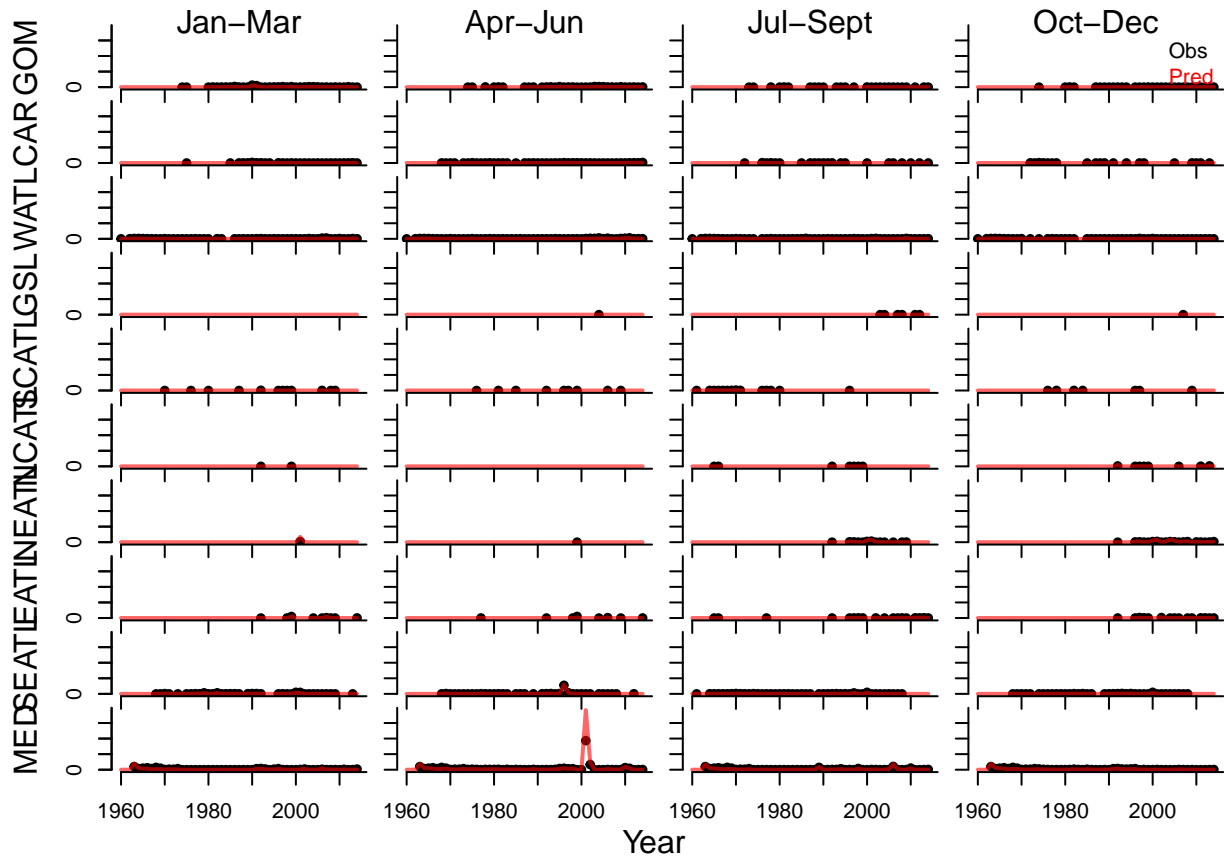

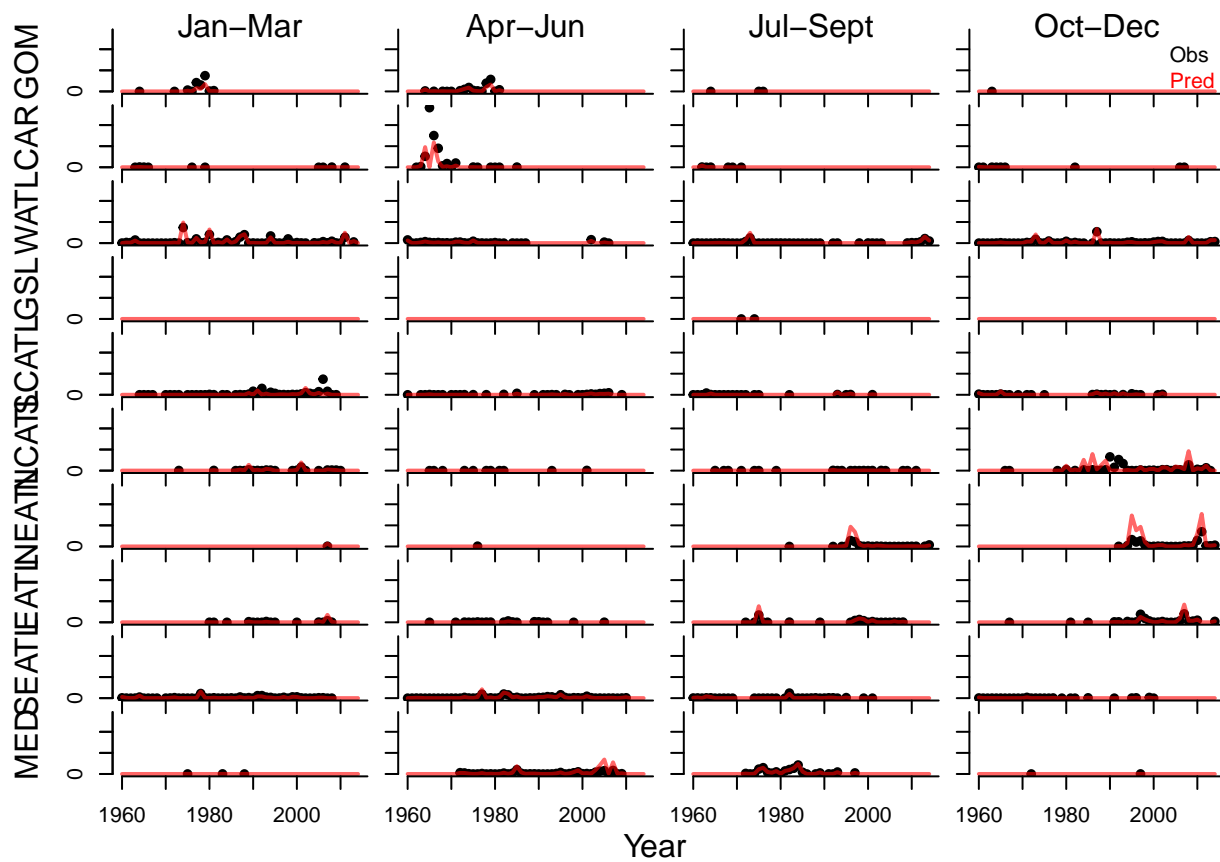

Figure 10.

Fit to observed catches

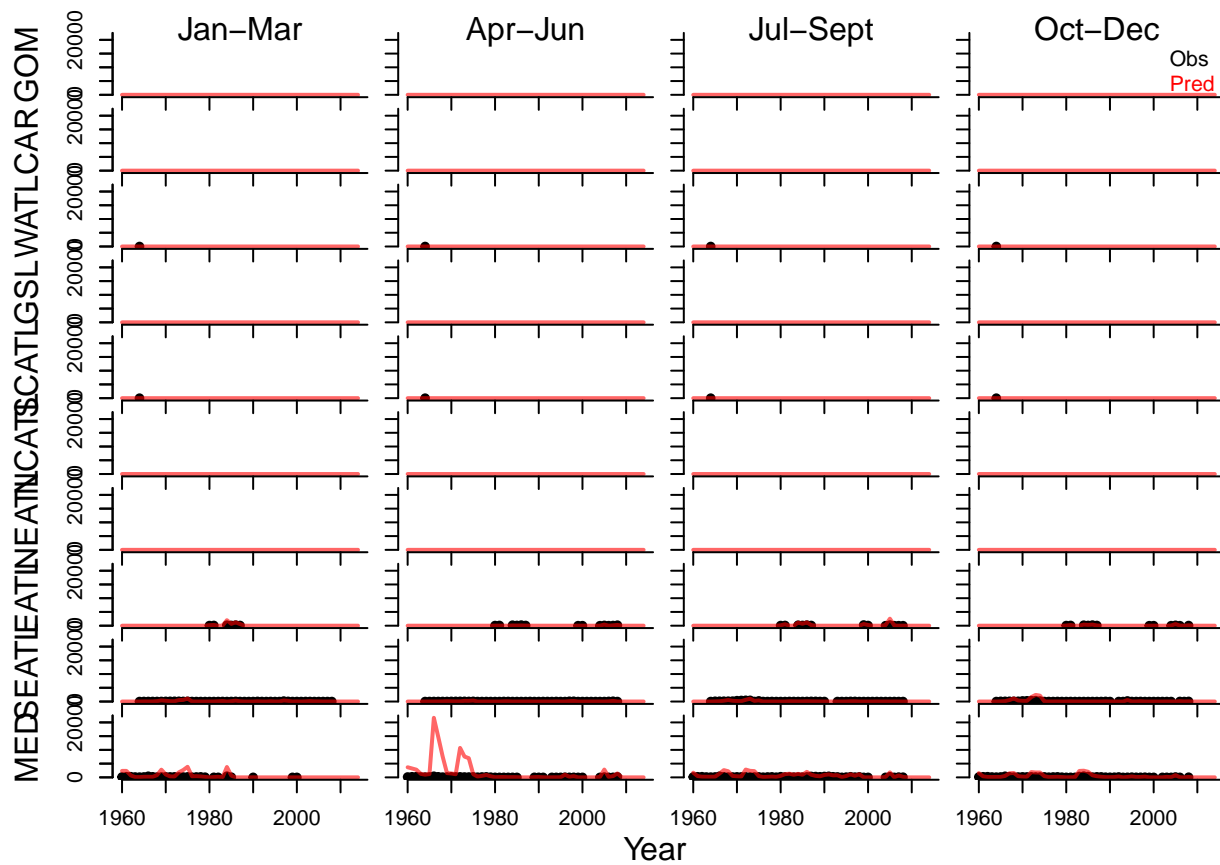

Observed catches (tonnes) for LLOTH

## Observed catches (tonnes) for LLJPN

## Observed catches (tonnes) for BBold

Observed catches (tonnes) for BBnew

Observed catches (tonnes) for PSMedRec

Observed catches (tonnes) for PSMedLOld

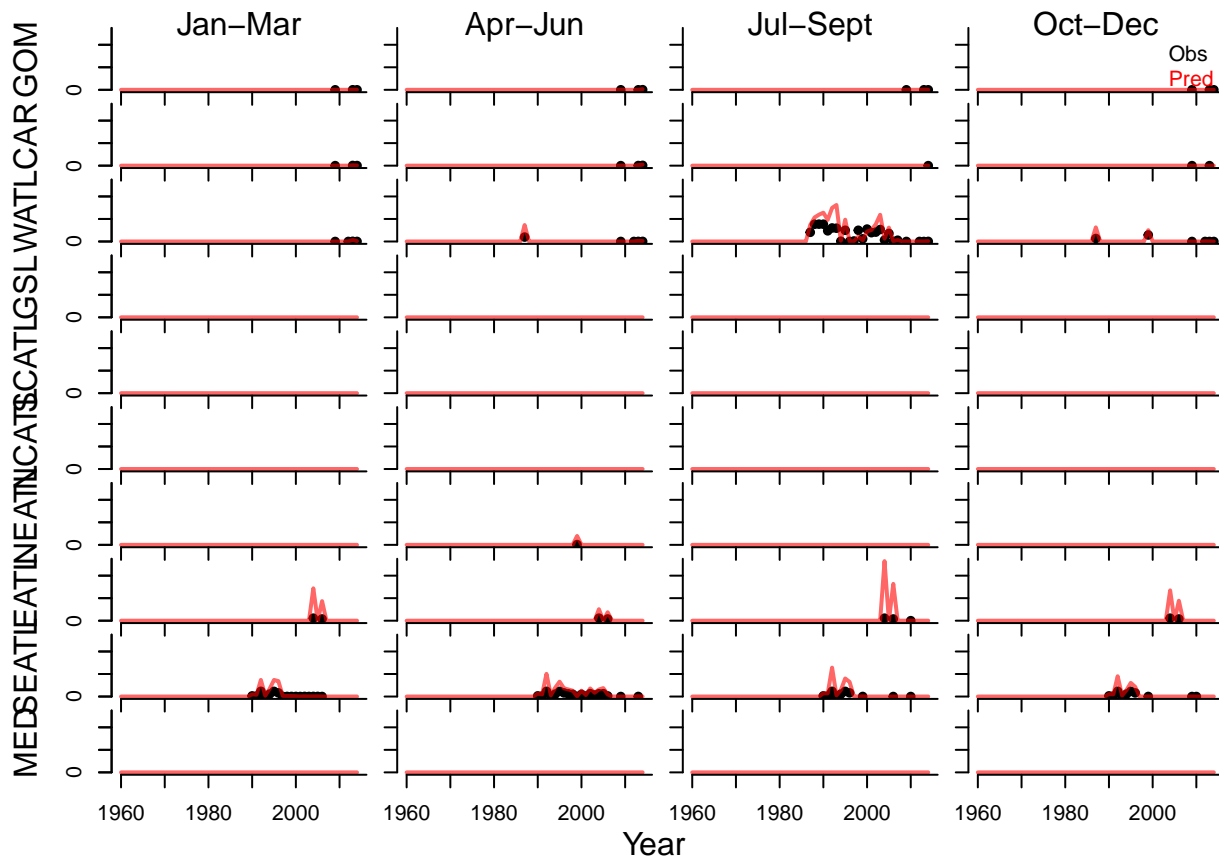

Observed catches (tonnes) for PSMedSOld

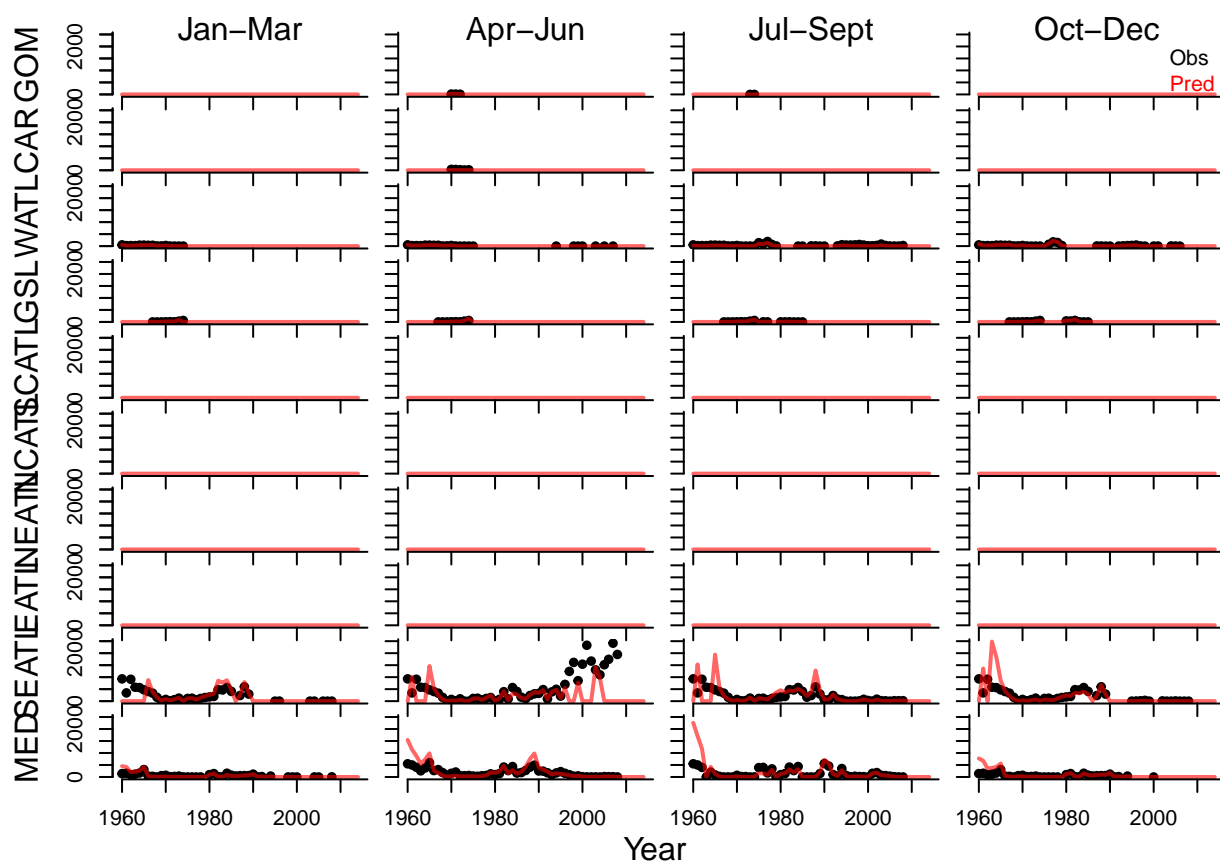

Observed catches (tonnes) for PSWestOld

Observed catches (tonnes) for PSWestnew

Observed catches (tonnes) for TPold

Observed catches (tonnes) for TPnew

Observed catches (tonnes) for RRCan

Observed catches (tonnes) for RRUSA

Observed catches (tonnes) for ALL OTH

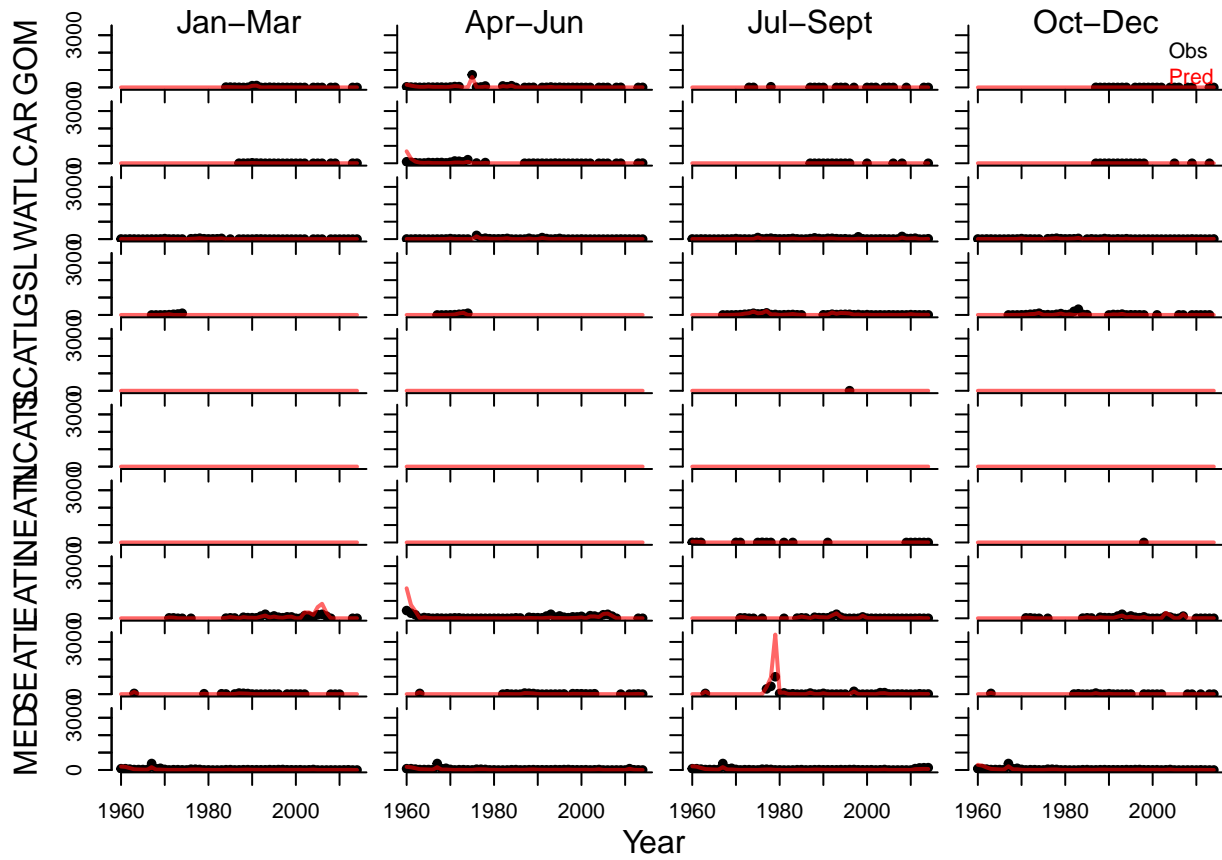

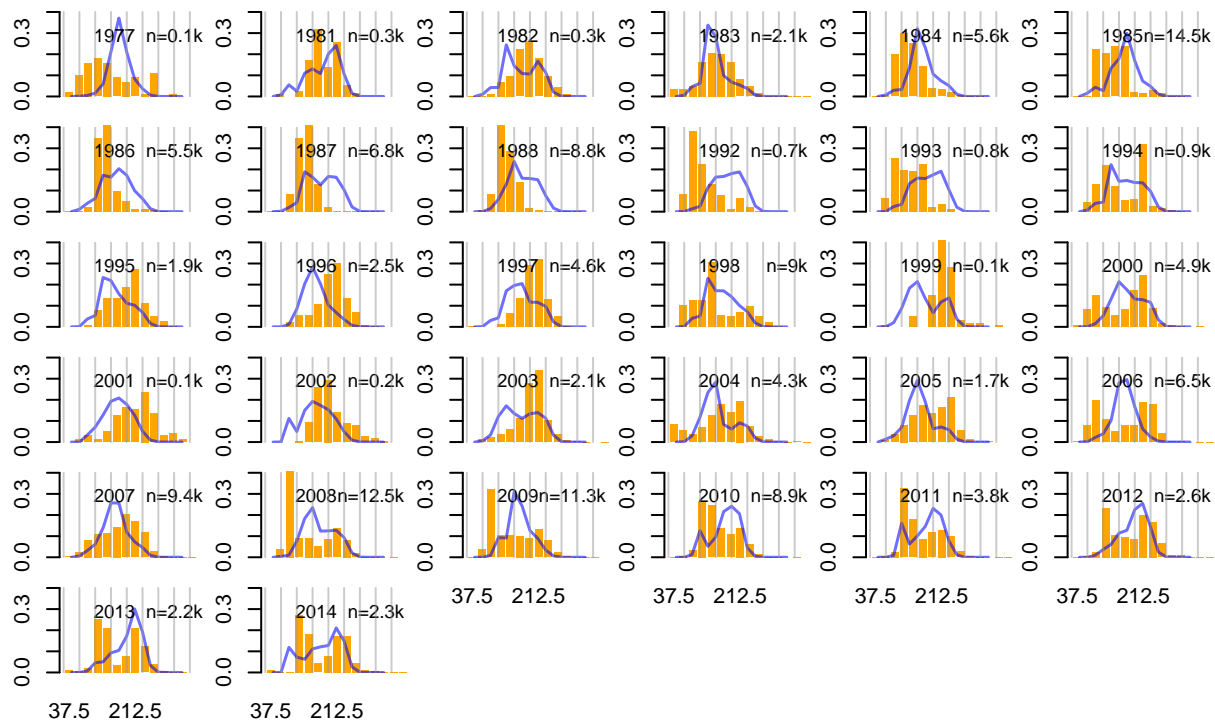

Figure 11.

## Fit to observed size composition

### Length composition fit for LLOTH

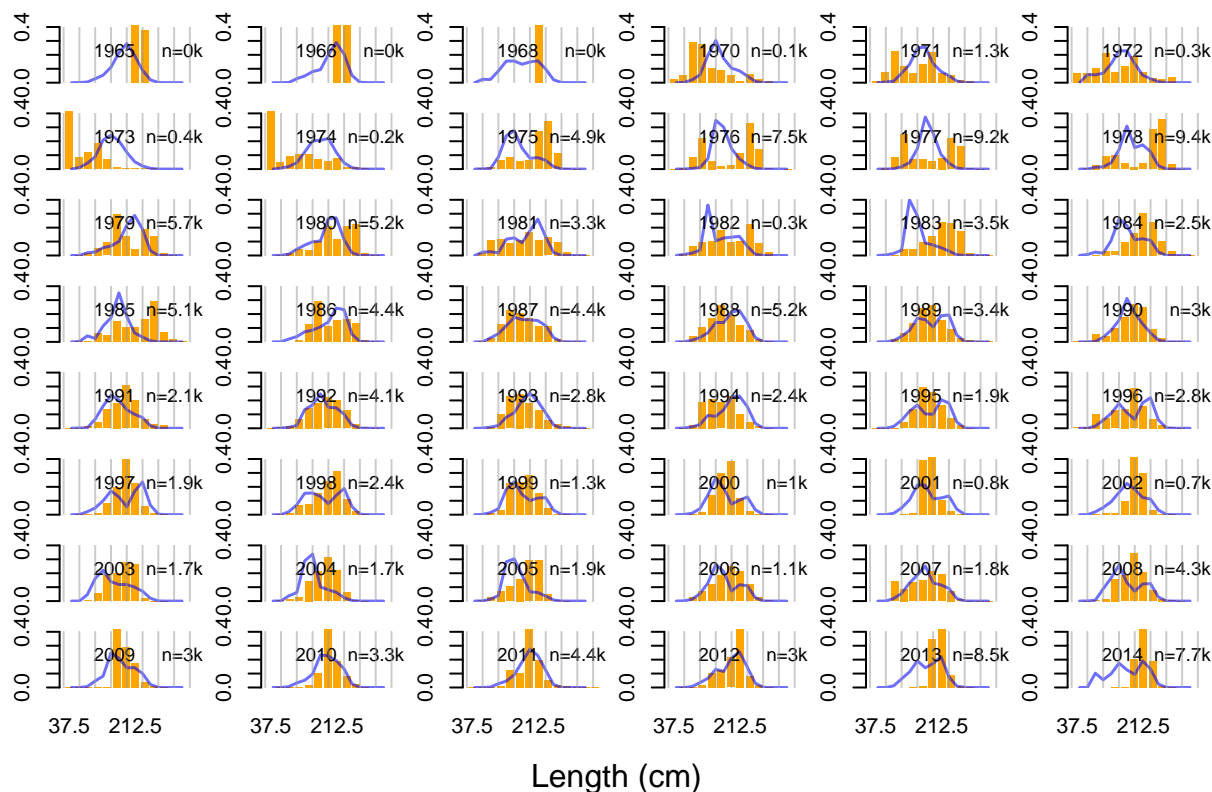

Predicted (line) versus observed (point) catch at length for the LLOTH fleet (n=137k)

Length (cm)

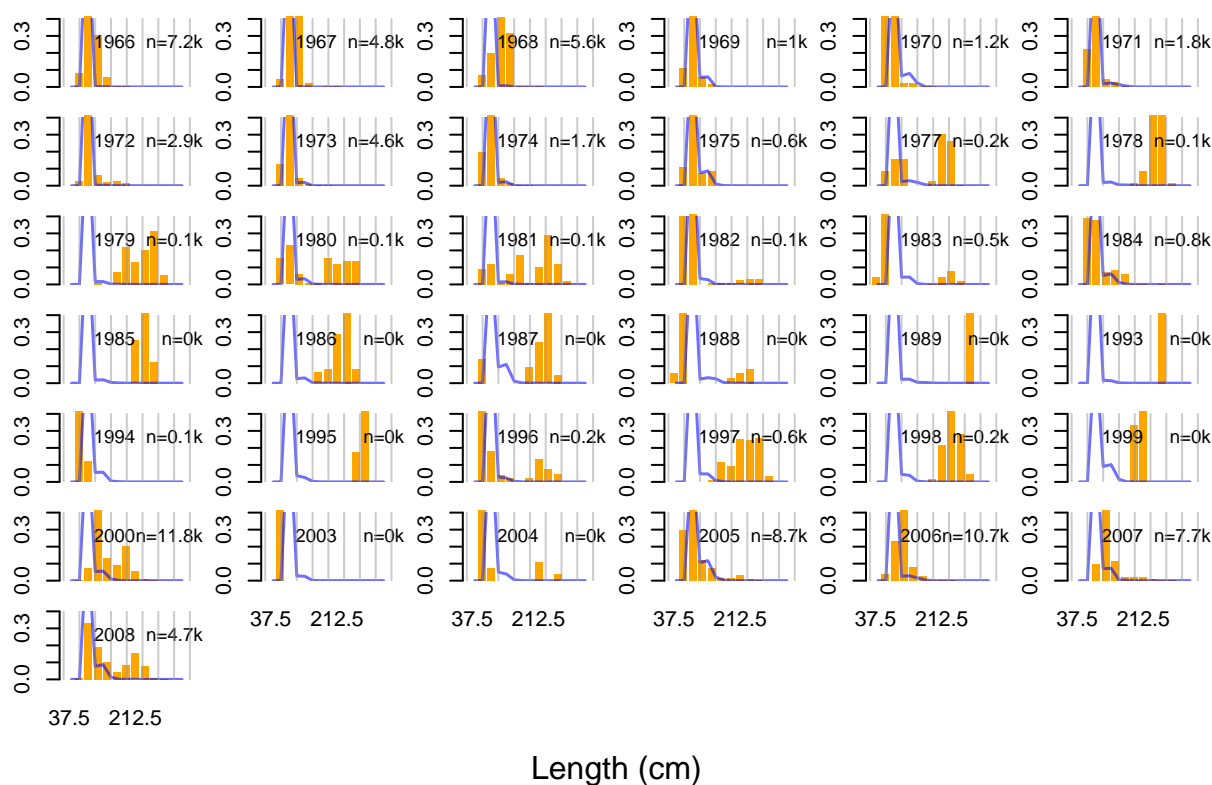

## Length composition fit for LLJPN

Predicted (line) versus observed (point) catch at length for the LLJPN fleet (n=146k)

## Length composition fit for BBold

Predicted (line) versus observed (point) catch at length for the BBold fleet (n=78k)

## Length composition fit for BBnew

Predicted (line) versus observed (point) catch at length for the BBnew fleet (n=18k)

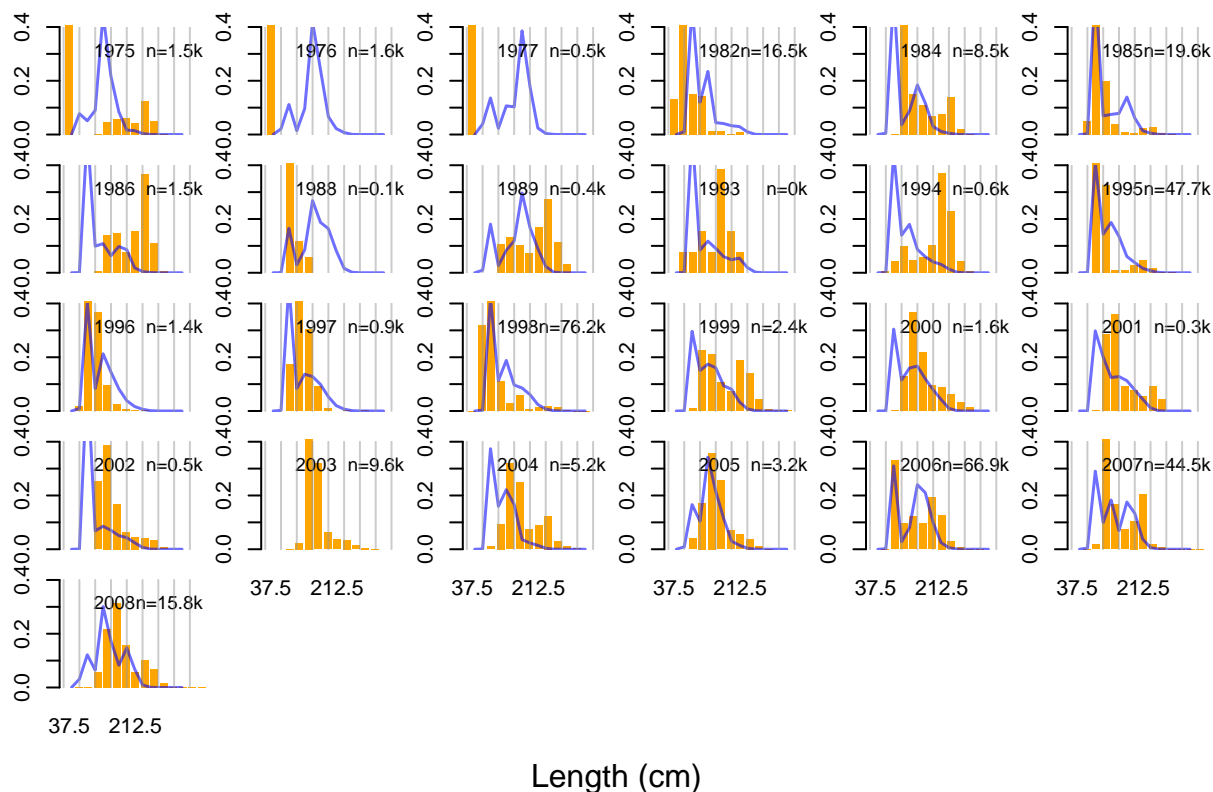

## Length composition fit for PSMedRec

Predicted (line) versus observed (point) catch at length for the PSMedRec fleet (n=470k)

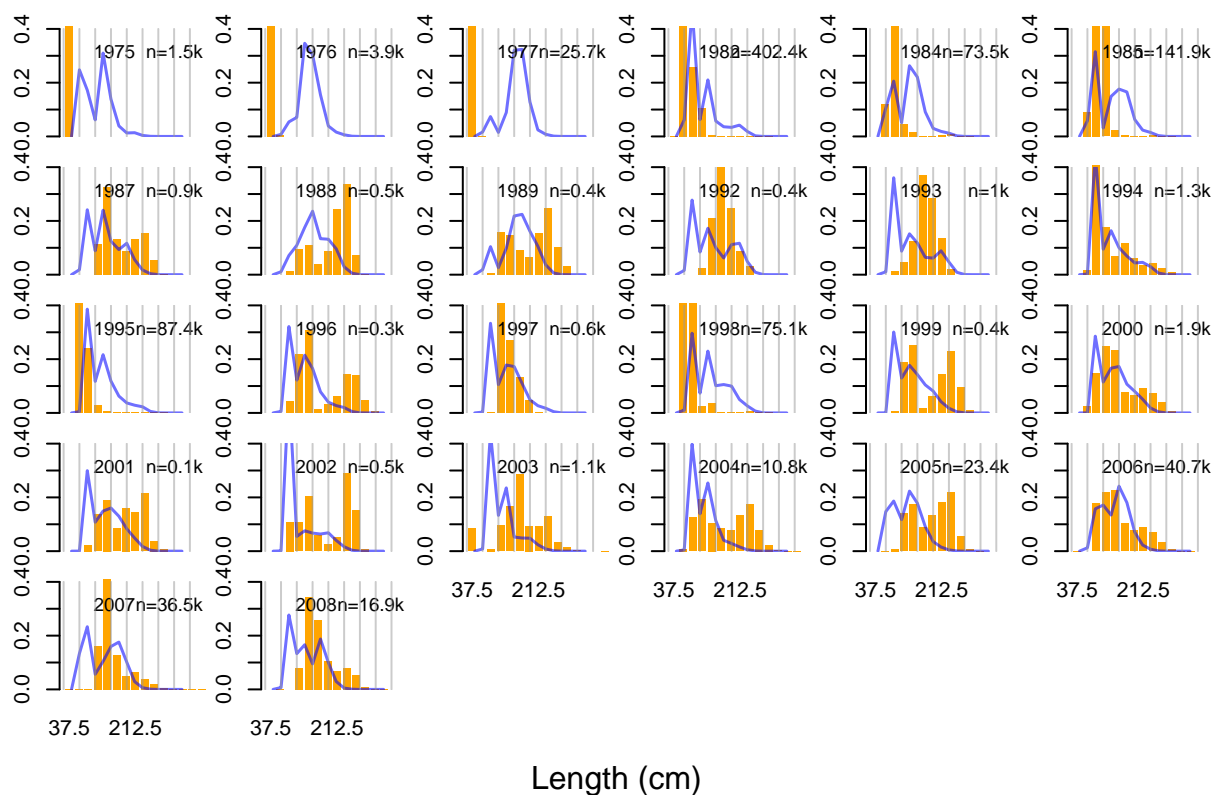

## Length composition fit for PSMedLOld

Predicted (line) versus observed (point) catch at length for the PSMedLOld fleet (n=327k)

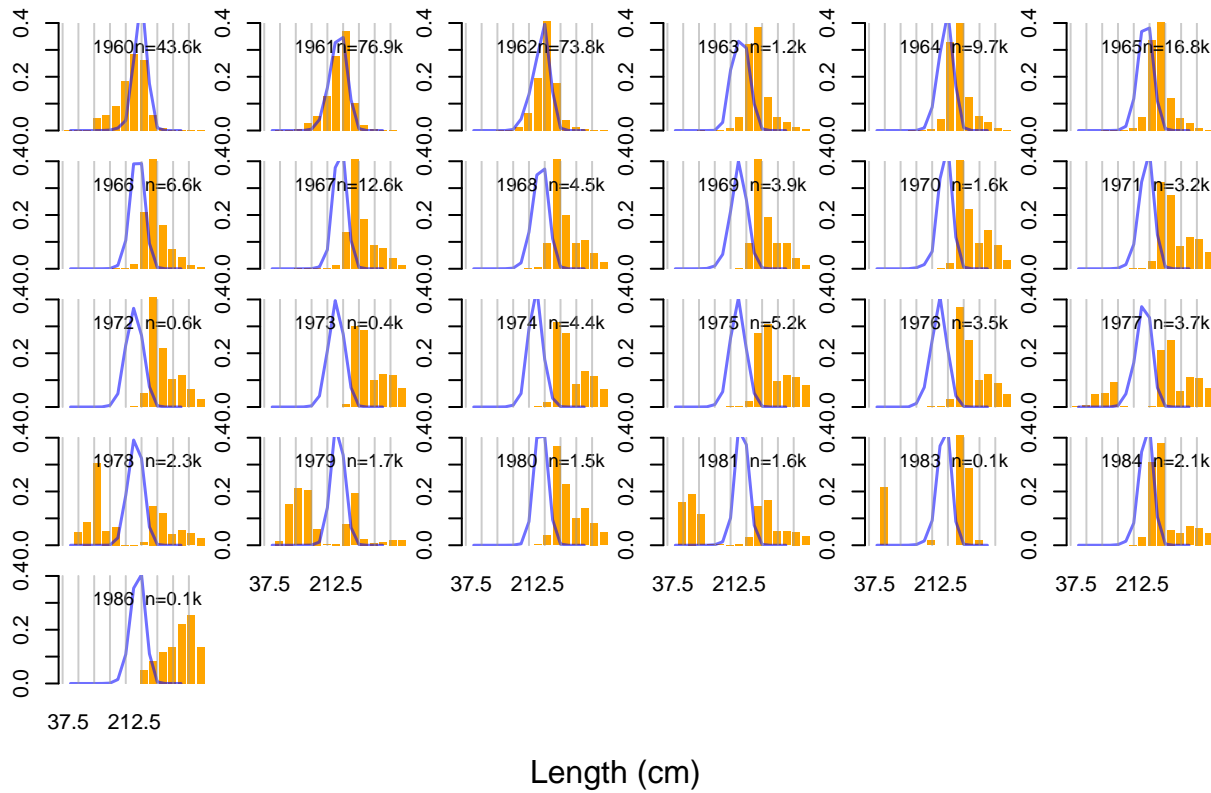

## Length composition fit for PSMedSOld

Predicted (line) versus observed (point) catch at length for the PSMedSOld fleet (n=949k)

## Length composition fit for PSWestOld

Predicted (line) versus observed (point) catch at length for the PSWestOld fleet (n=281k)

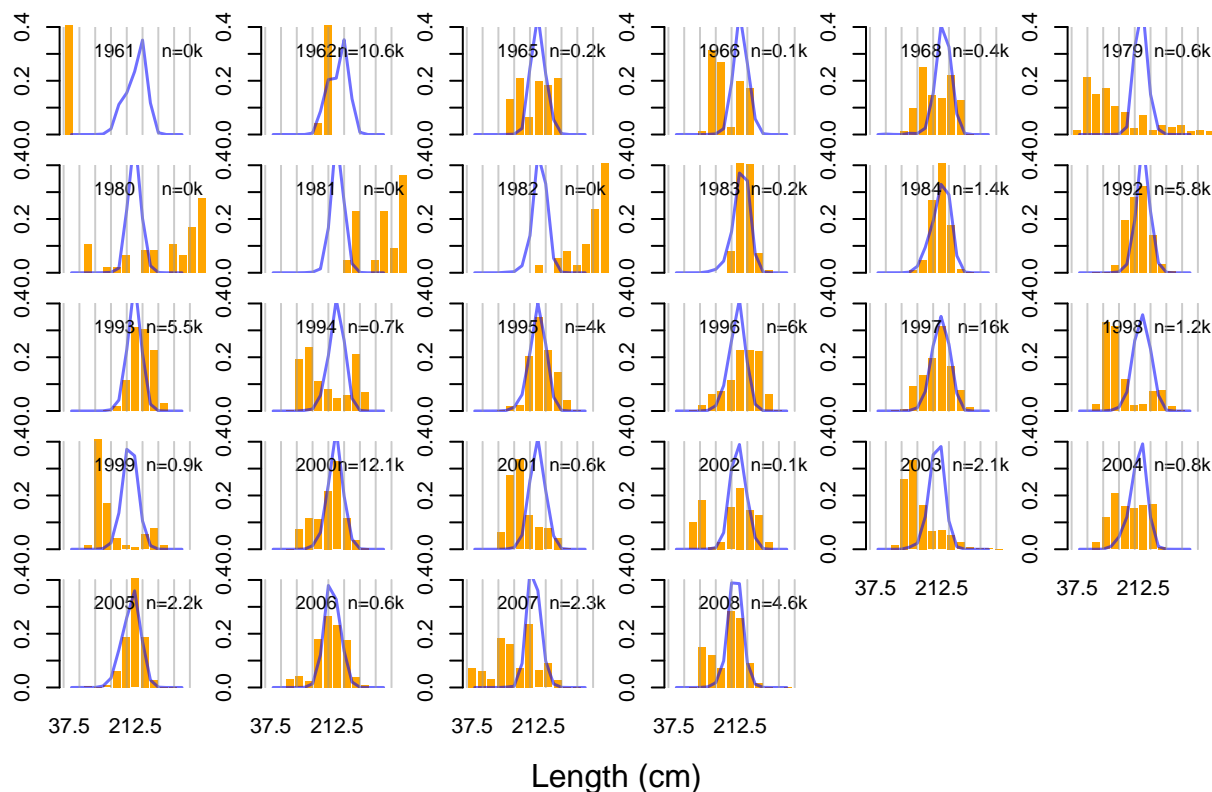

## Length composition fit for PSWestnew

Predicted (line) versus observed (point) catch at length for the PSWestnew fleet (n=29k)

## Length composition fit for TPOld

Predicted (line) versus observed (point) catch at length for the TPOld fleet (n=79k)

## Length composition fit for TPnew

Predicted (line) versus observed (point) catch at length for the TPnew fleet (n=27k)

## Length composition fit for RRCan

Predicted (line) versus observed (point) catch at length for the RRCan fleet (n=32k)

## Length composition fit for RRUSA

Predicted (line) versus observed (point) catch at length for the RRUSA fleet (n=5k)

## Length composition fit for ALL OTH

Predicted (line) versus observed (point) catch at length for the ALL OTH fleet (n=170k)

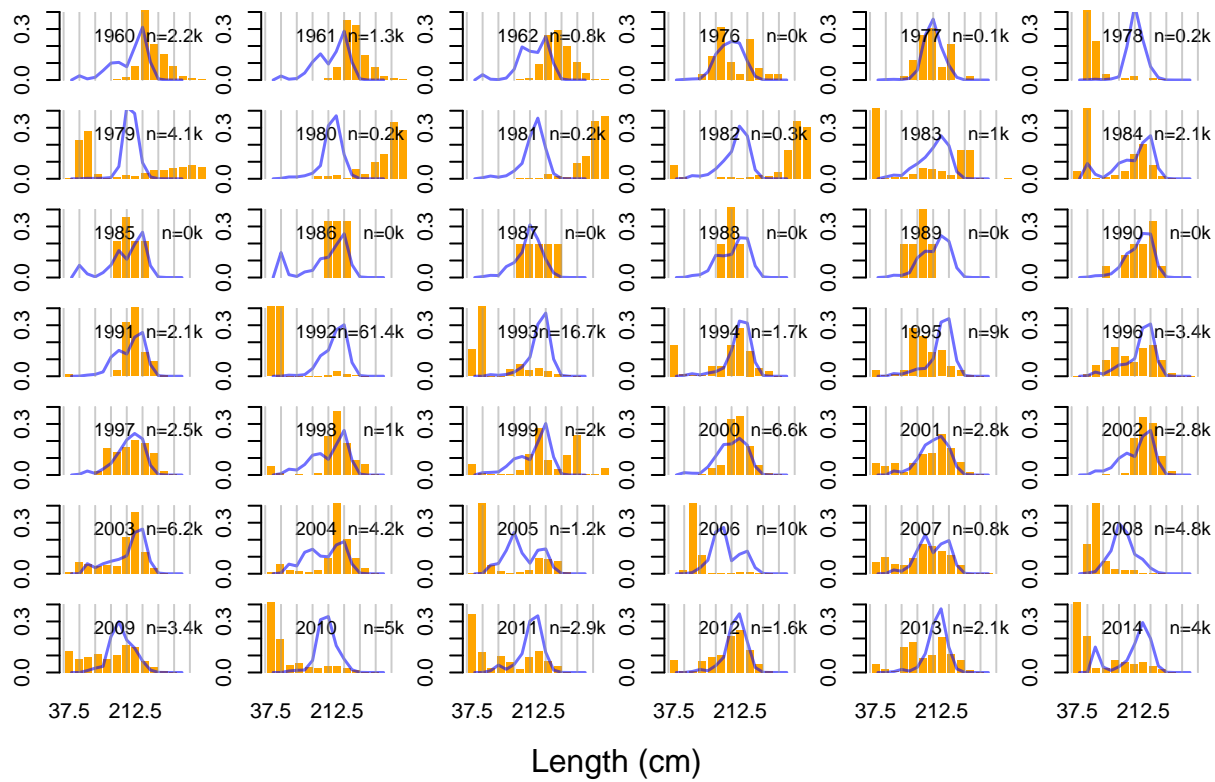

Figure 12. blue = predicted, orange = observed.
